

# AVEVA PDMS 12.0

The 3D plant design application for accurate and clash-free plant design

The process and power industries seek to commission high-quality plant earlier, and to bring it on line with minimum cost and minimum risk. Achieving this in the design domain requires highly functional and productive applications that can be executed effectively across globally distributed project teams.

AVEVA PDMS allows teams of designers to work together, each with their own specialist 3D colour-shaded environment, but able to view all of the design going on around them.

As the designers work, PDMS builds a sophisticated plant database from which all of the layout and detail drawings can be produced, together with accurate Material Take Off (MTO) information and all kinds of project reports such as Line List or Valve Schedules.

AVEVA PDMS can design every detail - even on the world's largest projects

The PDMS approach enables a wide range of sophisticated design checks to be carried out across all aspects of the design to check and improve quality. Drawings and reports are generated directly from the model database to ensure consistency between design information and the project deliverables.

There are no limits to project size or complexity. PDMS is proven on projects ranging from the smallest refit to the largest green field projects, and is compatible with all the engineering issue, revision and change-control processes required across such projects.

## Business Benefits

### Summary:

- Reduced site rework.
- More effective use of globally dispersed design teams.
- Higher design efficiency.
- Improved quality.
- Clear identification of the cost of changes.
- Reduced schedule times.
