General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the  
lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an  
appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically  
analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical  
conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks  
textbooks don t write experiments A student s scientific literacy grows when experiences and observations associated with  
the scientific method are encountered Further experimentation provides additional cause effect observations leading to an  
even better understanding of the experiment The 11th edition s experiments are informative and challenging while offering a  
solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post  
lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook  
and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment s  
Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling  
data is supported by the Data Analysis section      *Host Bibliographic Record for Boundwith Item Barcode 30112062967754*
