

CHAPTER 11 Chapter Test **Form C, continued**

8. Write the equation of the line that passes through the points $(-10, 6)$ and $(15, 1)$ in slope-intercept form.

$$y = -\frac{1}{5}x + 4$$

9. Identify a point the line for $y + 7 = -\frac{3}{5}(x - 4)$ passes through and identify the slope of the line.

Possible answer: $(4, -7)$; $-\frac{3}{5}$

10. Write the point-slope form of the equation for a line with a slope of $-\frac{1}{71}$ that passes through the point $(-21, \frac{1}{2})$.

$$y - \frac{1}{2} = -\frac{1}{71}(x + 21)$$

Find each equation of direct variation, given that y varies directly with x .

11. y is -63 when x is 81

$$y = -\frac{7}{9}x$$

12. y is $\frac{3}{5}$ when x is $\frac{1}{2}$

$$y = \frac{6}{5}x$$

Graph each inequality.

13. $\frac{1}{4}y > -\frac{1}{6}x + \frac{1}{2}$

14. $-3x + 4y \leq 12$

Use a line of best fit to answer the question.

15. The value of a car decreases as it is driven more miles. The data are shown below. Find a line of best fit for the data. Use the equation to predict the value of the car at 24,000 miles.

Miles	Value of Car
10,000	\$14,500
12,000	\$14,150
14,000	\$13,815
16,000	\$13,650
18,000	\$13,500

Possible answer: $y = -0.125x + 15,673$; about \$12,673

16. In order to rent an apartment, Vik makes an initial payment of \$1535, and each month he must pay \$750. The equation $y = 750x + 1535$ represents the amount of money Vik has paid after x months. After 2 years, how much rent money has Vik paid?

Rudnitski, 1995 **innovations in Learning** Leona Schauble, Robert Glaser, 2013-04-03 This volume documents the growth of a new kind of interdisciplinary teamwork that is evolving among practitioners researchers teacher educators and

community partners Its premise the design of learning environments and the development of theory must proceed in a mutually supportive fashion Scientific researchers have learned that a prerequisite to studying the kinds of learning that matter is helping to shoulder the responsibility for ensuring that these forms of learning occur To support and study learning researchers are increasingly making major and long term investments in the design and maintenance of contexts for learning Practitioners are assuming new roles as well reflecting an increasing awareness of the need to move beyond skillful doing If developing learning contexts are to be protected within and expanded beyond the systems that surround them it is necessary to foster professional communities that will support reflection about practice including the generation and evaluation of rich and flexible environments for student thinking One consequence of recent reforms is that teachers are increasingly regarding such tasks as central to their professional development Innovations in Learning New Environments for Education describes coordinated interaction between educational design on the one hand and the development of learning theory on the other through a series of examples These examples have been chosen because they are continuing proven programs with evidence of success Contributors to the volume are researchers and practitioners who have played a role in inventing these programs and have guided their development over a period of years Rather than choosing illustrations of a pipeline or application model of research from research and then to practice the editors of this volume have selected interventions in which researchers and practitioners work together persistently to forge common understanding Such activity is necessarily interdisciplinary often encompassing long spans of time and is more akin to engineering in the field than to laboratory science The common themes that emerge from this activity for example the role of tools talk and community belong exclusively neither to theory nor to practice but to their intersection in commitment to specific contexts of learning and continuing contributions to practice and underlying theory This volume is organized into three sections that reflect different levels and kinds of learning contexts Each of these levels has been the focus of recent cognitive and reform applications to learning and schooling The first offers examples of effective learning in informal settings the second discusses innovative approaches to schooling at the classroom level and the third reviews reforms that regard the entire school as the appropriate unit of change
