J. Albert Rorabacher

Bihar Board Inter Result 2014:

Climate Change and Agriculture in India: Impact and Adaptation Syed Sheraz Mahdi, 2018-09-12 This book provides the most recent understanding about climate change and its effects on agriculture in India. Further in depth research is showcased regarding important allied sectors such as horticulture and fisheries and examines the effect of climate change on different cereal crops. The individual chapters discuss the different mitigation strategies for climate change impacts and detail abiotic and biotic stresses in relation to climate change. The book provides an insight into environmentally safe and modern technologies approaches such as nanotechnology and utilization of underutilized crops under a changing climate. This book provides a solid foundation for the discussion of climate resilience in agricultural systems and the requirements to keep improving agricultural production. This book is an excellent resource for researchers, instructors, students in agriculture, horticulture and environmental science.

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress, development and globalization, the latter a form of human and economic homogenization. These processes through the aegis of the United Nations are comparatively monitored. Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance. For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila. Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non-Western settings. As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid. For politicians there is no long term benefit to be derived from successful development. In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help. The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition and patterns of behaviour that can be traced back millennia. In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates.

Current Consumer Cases, 2017 **Boundary Lab** Nandan Kamath, 2024-02-29 Sport is a petri dish. In it, society tests not only human limits but also individual and collective attitudes and norms often before they impact the wider world beyond the boundary. In its quest for universal rules, organized sport must regularly balance multiple interests and answer difficult questions. This helps sport and through sport, society to tweak laws, markets, morals and technological advances. The outcomes of the resulting debates influence the way we live, view each other and organize our world. Why should we care about sport and its governance? Within the covers of *Boundary Lab* lie the answers.
