Fulton, 1999 *The Failure of Planning* Richard Hogan, 2003 *Talk City* William Fulton, 2017 *Talk City* is a collection of the remarkable blogs the distinguished urban planner Bill Fulton wrote while serving as a member of the City Council in the California beach town of Ventura The blog started out as a way to explain what had happened at the weekly council meetings Before long however it turned into an evocative real time chronicle of what it was like to serve as an underpaid overstressed part time local elected official during hard times If you like local government and politics you'll love how *Talk City* reveals the stresses and strains of serving as an elected official in a typical American city **The Reluctant Metropolis** William Fulton, 2001-12-04 A Los Angeles Times Bestseller William Fulton is the Raymond Chandler of Los Angeles real estate Kevin Starr California State Librarian and author of *Material Dreams Los Angeles through the 1920s* A Los Angeles Times Bestseller William Fulton is the Raymond Chandler of Los Angeles real estate Kevin Starr California State Librarian and author of *Material Dreams Los Angeles through the 1920s* In twelve engaging essays William Fulton chronicles the history of urban planning in the Los Angeles metropolitan area tracing the legacy of short sighted political and financial gains that has resulted in a vast urban region on the brink of disaster Looking at such diverse topics as shady real estate speculations the construction of the Los Angeles subway the battle over the future of South Central L A after the 1992 riots and the emergence of Las Vegas as the new Los Angeles Fulton offers a fresh perspective on the city's epic sprawl The only way to reverse the historical trends that have made Los Angeles increasingly unliveable Fulton concludes is to confront the prevailing cocoon citizenship the mind set that prevents the city's inhabitants and leaders from recognizing Los Angeles's patchwork of communities as a single metropolis

Custodians of Place Paul George Lewis, Max Neiman, 2009 *Custodians of Place* provides a new theoretical framework that accounts for how different types of cities arrive at decisions about residential growth and economic development Lewis and

Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth Custodians of Place answers these and many other questions

California Policy Choices ,1992 **Land of Sunshine** William Deverell,Greg Hise,2011-12-12 Most people equate Los Angeles with smog sprawl forty suburbs in search of a city the great what not to do of twentieth century city building But there s much more to LA s story than this shallow stereotype History shows that Los Angeles was intensely ubiquitously planned The consequences of that planning the environmental history of urbanism is one place to turn for the more complex lessons LA has to offer Working forward from ancient times and ancient ecologies to the very recent past Land of Sunshine is a fascinating exploration of the environmental history of greater Los Angeles Rather than rehearsing a litany of errors or insults against nature rather than decrying the lost opportunities of roads not taken these essays by nineteen leading geologists ecologists and historians instead consider the changing dynamics both of the city and of nature In the nineteenth century for example density was considered an evil and reformers struggled mightily to move the working poor out to areas where better sanitation and flowers and parks made life seem worth the living We now call that vision sprawl and we struggle just as much to bring middle class people back into the core of American cities There s nothing natural or inevitable about such turns of events It s only by paying very close attention to the ways metropolitan nature has been constructed and construed that meaningful lessons can be drawn History matters So here are the plants and animals of the Los Angeles basin its rivers and watersheds Here are the landscapes of fact and fantasy the historical actors events and circumstances that have proved transformative over and over again The result is a nuanced and rich portrait of Los Angeles that will serve planners communities and environmentalists as they look to the past for clues if not blueprints for enhancing the quality and viability of cities

State of California Comprehensive Housing Affordability Strategy ,1994 **Best Practices** California. Legislature. Senate. Committee on Local Government,2004 *Comprehensive Housing Affordability Strategy for Federal Fiscal Years 1994 Through 1998* ,1993 *City Planning in America* Mary Hommann,1993-06-30 This sure to be controversial work examines the failure of city planning in America the results of that failure as seen in the day to day lives of our cities and the reasons behind that failure Hommann contends that although desperately needed by and large city planning has no effect on urban development in this country where developers are supreme For the most part local

planners must deal with a daily fiction regarding their involvement in developmental decisions a fiction that ultimately drives many into alternate pursuits After tracing the history of American development and planning the author argues that greed settled this country and continues to control economic and developmental decisions accompanied in this century by criminal conspiracy The result is the civic deprivation that debilitates millions of Americans culturally socially and economically This study will be of interest to scholars students and professionals in planning urban studies architecture public administration sociology political science housing civil engineering traffic engineering transportation planning city management and environment legislators local politicians civic leaders lawyers dealing in public policy and land development as well as enlightened citizens from the business world **The California Handbook** Ted Trzyna, Julie Didion, 1998-10
