

The D&B Viability Rating™

Quick Guide

The D&B Viability Rating is a new evaluation tool that offers a comprehensive assessment of whether or not to do business with a company. Only the D&B Viability Rating combines the most comprehensive measures of risk to deliver a highly reliable rating analyzing the current and future health of a business.

The Difference between the Viability Score and Portfolio Comparison?

Viability Score assesses the probability that a company will no longer be in business within the next 12 months, compared to all US businesses within the D&B database. Best used when ranking businesses within your portfolio.

Portfolio Comparison reflects the viability assessment of a company's company as only to businesses as opposed to similar D&B "model segment" classifications, which is determined by the amount and type of data available. These businesses are only ranked along with other businesses that provide the same data, hence, 1 out of 2 models, or less, are included.

Model Segment: Available Financial Statement Data
