Beyond Science Fiction February 2015:

Brain in the Vat Stories Adam Mac, 2023-01-01 This thin volume is a collection of 10 of Adam Mac's brain in the vat BIV short fictions. These stories take off from the clever thought experiments of philosophers who have long discoursed on mind brain duality and bring us to today when science and technology are taking over the narrative from science fiction to show us an emerging brave new taxonomy of life: the Internet of self-aware Things. The first five stories are related and could be considered parts of a longer story. The other five are independent of one another. The Trans and Non-Binary Hero's Journey Valerie Estelle Frankel, Dean Leetal, 2024-07-10 A brave heroine whose quest involves living her true gender. A genderqueer knight who battles the transphobic court to save their prince. Often fearing discovery, the trans hero embarks on adventure aided by an accepting mentor and other allies and challenged by transphobic villains and sometimes uncomprehending family members. Ultimately, the trans hero triumphs, finding love, selfhood, and affirmation. This book adapts Joseph Campbell's classic pattern of comparative mythology and applies it to trans and non-binary heroes in modern popular media who are traversing multiple worlds. Analyzed are works for the screen such as *Steven Universe*, *The Matrix*, *Sense8*, and *Sandman*; print materials such as DC and Marvel comics and television; fantasy books and graphic novels from trans and non-binary creators worldwide. James Tiptree, Jr. Award Cumulative List Jeanne Gomoll, 2019-10-25 This book lists all the Tiptree Award winners, Tiptree honor lists, and Tiptree long lists since the founding of the award in 1990 through 2019 when the awards name was changed to the Otherwise Award. In addition, the Tiptree retrospective awards presented in 1996 are listed. Also included are ceremony site art prizes and songs with which the winners were serenaded during the award ceremonies. **Focus On: 100 Most Popular American Science Fiction Films** Wikipedia contributors, **Invoking the Beyond:** Paul D. Collins, Phillip D. Collins, 2020-11-22 The Gnostic revival of the Enlightenment witnessed the erection of what could be called the Kantian Rift, an epistemological barrier between external reality and the mind of the percipient. Arbitrarily proclaimed by German philosopher Immanuel Kant, this barrier rendered the world as a terra incognita. Suddenly, the world out there was deemed imperceptible and unknowable. In addition to the outer world, the cherished metaphysical certainties of antiquity—the soul, a transcendent order, and God—swiftly evaporated. The way was paved for a new set of modern mythmakers who would populate the world out there with their own surrogates for the Divine. Collectively, these surrogates could be referred to as the Beyond, because they epistemologically and ontologically overwhelm humanity. In recent years, the Beyond has been invoked by theoreticians, literary figures, intelligence circles, and deep state operatives who share some variant of a technocratic vision for the world. In turn, these mythmakers have either directly or indirectly served elitist interests that have been working toward the establishment of a global government and the creation of a New Man. Their hegemony has been legitimized through the invocation of a wrathful earth goddess, a technological Singularity, a superweapon, and extraterrestrial gods. All of these are merely masks for the same counterfeit divinity: the Beyond. Beyond

Analog Science Fiction & Fact, 2006 **Black Holes** Brian Cox, Jeff Forshaw, 2023-03-28 By the star physicist and author of multiple 1 Sunday Times

bestsellers a major and definitive narrative work on black holes and how they can help us understand the universe At the heart of our galaxy lies a monster so deadly it can bend space throwing vast jets of radiation millions of light years out into the cosmos Its kind were the very first inhabitants of the universe the black holes Today across the universe at the heart of every galaxy and dotted throughout mature black holes are creating chaos And in a quiet part of the universe the Swift satellite has picked up evidence of a gruesome death caused by one of these dark powers High energy X ray flares shooting out from deep within the Draco constellation are thought to be the dying cries of a white dwarf star being ripped apart by the

intense tides of a supermassive black hole heating it to millions of degrees as it is shredded at the event horizon They have the power to wipe out any of the universe's other inhabitants but no one has ever seen a black hole itself die But 1.8 billion light years away the LIGO instruments have recently detected something that could be the closest a black hole gets to death Gravitational waves given off as two enormous black holes merge together And now scientists think that these gravitational waves could be evidence of two black holes connecting to form a wormhole a link through space and time It seems outlandish but today's physicists are daring to think the unthinkable that black holes could connect us to another universe At their very heart black holes are also where Einstein's Theory of General Relativity is stretched in almost unimaginable ways revealing black holes as the key to our understanding of the fundamentals of our universe and perhaps all other universes Join Professors Brian Cox and Jeff Forshaw in exploring our universe's most mysterious inhabitants how they are formed why they are essential components of every galaxy including our own and what secrets they still hold waiting to be discovered

Demos, Cecilia Sjöholm, Ekaterina Degot', 2015 Ever since the nineteen nineties curatorial discourse has revolved around the figure of the professional curator Consequently curatorial politics is usually considered the direct result of a curator's deliberate acts and intentions Now however new institutional models and modes of exhibition practice together with key shifts in funding and collecting strategies have revealed aspects of curatorial politics over which the exhibition maker has little or no control The present volume presents a series of essays by noted art theorists and cultural scientists that go beyond the perspective of the individual curator to reveal these previously unexplored levels of curatorial politics
