

EUROLIVE B1200D-PRO

High-Performance Active 500-Watt
12" PA Subwoofer with Built-In
Stereo Crossover

- High-performance 500-Watt powered subwoofer for PA applications.
- Powerful 12" long-excursion transducer with high temperature voice coil provides incredibly accurate and pulse-pounding bass.
- Precise reproduction of ultra-low frequencies for "bulletproof" punch and impact.
- State-of-the-art 500-Watt Class-D amplifier with comprehensive over-excursion, thermal and clip limit protection.
- Built-in active stereo crossover provides high-pass filtered outputs for full-range loudspeakers.
- Tunable and switchable Bass Boost plus Phase switch for ultimate low-frequency performance.
- Variable High Cut control for perfect sound alignment.
- Subwoofer Level control to adjust the balance between subwoofer and the full-range speakers.
- Power, Signal and Clip LEDs for perfect monitoring.
- Intelligent limiter for maximum sound performance and woofer protection.
- Internal switch-mode power supply for noise-free audio, superior transient response and very low power consumption.

With thousands in use around the world, our EUROLIVE B1500D-PRO and B1800D-PRO active subwoofers have become the new standard in low-frequency reproduction. But what if your application calls for a smaller system that still kicks serious butt?

The EUROLIVE B1200D-PRO packs everything there is to love about these powerful systems into a more compact, easy to transport enclosure, making them ideal for small- to mid-sized venues. Armed with a 500-Watt Class-D amplifier and a host of truly professional features, these little brutes crank out tons of tight, low-end punch—with the definition and clarity typically reserved for much larger systems.

Put simply, these cool-running systems provide an impressive power-to-weight ratio—and our no-compromise design means you get amazingly deep, chest-pounding bass that will keep the party going all night long.

What is Class-D Technology?

Instead of operating relatively continuously like Class-AB circuits, Class-D amps switch on and off thousands of times per second, delivering power only when needed. The amplifier is either fully on or fully off, which significantly reduces power losses from the output devices given off as heat. Less heat means our Class-D amps don't need massive heat sinks, and that means we can make them lighter. Plus B1200D-PRO's amplifier provides all the dynamic punch and fidelity you'd expect from a much larger, more expensive subwoofer.

Custom-Designed Transducers

The transducers (woofers and tweeters) are the only part of a sound system you actually hear, so we never cut corners, and we never just grab whatever happens to be on the shelf. We custom-design our own so they are the perfect match for both the amplifier and the application. We wind our own voice coils, process the paper pulp into cones and even machine our own backplates. This enables us to control the quality, and frankly, make better components. The 12" long-excursion, low-frequency transducer was designed specifically for use in the EUROLIVE B1200D-PRO.
