**Studies in Higher Education** University of Minnesota. Committee on Educational Research,1943\* Studies in Higher Education was first published in 1943 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions During this period the Committee on Educational Research devoted its resources primarily to two university wide studies those concerned with faculty services and with the curriculum The teaching load investigation formed the basis for establishing a sensible teaching load and provided a comprehensive analysis of the manifold activities for which the faculty and administrative staff are responsible The curriculum study will be of greatest value if followed by more intensive studies in particular departments or colleges some of which are already under way

A Degree and what Else? Stephen Bassett Withey,Carnegie Commission on Higher Education,1971

*The Impact of College on Students* Kenneth A. Feldman,2020-02-18 In this landmark work Kenneth Feldman and Theodore Newcomb review and synthesize the findings of more than 1 500 studies conducted over four decades on the subject Writing in 1991 Ernest Pascarella and Patrick Terenzini maintained that The Impact of College on Students not only provided the first comprehensive conceptual map of generally uncharted terrain but also generated a number of major hypotheses about how college influences students They also noted that Feldman and Newcombe helped to stimulate a torrent of studies on the characteristics of collegiate institutions and how students change and benefit during and after their college years from college attendance The Impact of College on Students is now a standard text in graduate courses as well as a standard and frequently cited reference for scholars students and administrators of higher education Much of what we understand about the developmental influence of college is based on this work

**Research Studies in Higher Education** Terence Hicks,Abul Pitre,2012 The book provides quantitative and qualitative research studies regarding African American first generation undecided and non traditional college students The book includes important recommendations for university administrators faculty and staff in supporting the academic personal and social adjustment of college life of various types of students

**University and School Connections** Irma N. Guadarrama,John Ramsey,Janice L. Nath,2008-06-01 The need for strengthening the connections between university based teacher education programs and schools has never been greater in an era where standards and accountability systems often play centric roles in practically all aspects of the education field Within this context university educators and school

practitioners have increasingly focused their attention on how professional development schools produce the multiplicity of outcomes that address the exigencies of quality programs for educating teachers and improving school achievement. In keeping with the mission of producing a collection of papers that inform, enlighten and motivate readers, Volume 3 of the Professional Development Schools book series provides practitioners and researchers with articles on a substantial variety of themes on the most recent developments of the field. Among the thematic threads that organize Volume 3 are: 1) using the national standards to examine and evaluate PDSs; 2) implementation, development and leadership issues relevant to beginning and experienced PDSs; 3) using innovative means for student assessments and mentoring in preservice education within a PDS context; 4) the impact of PDSs on teacher education and student achievement; and 5) cases of PDSs and the value of lessons learned. Volume 3 is similar to the previous two volumes in that it includes both practitioner and researcher strands; however, the authors in the current volume carry a sense of maturity and exude a tone of confidence in their voice. Professional development schools research is an important aspect of teacher education. The collection of articles in Volume 3 contributes to our understanding of their essential qualities and offers assurance that innovation, change and quality are building blocks in professional development schools.

Collegiate Educational Research, University of Minnesota. University of Minnesota. Committee on Educational Research, 1931 **Beyond the Skills Gap** Matthew T. Hora, 2019-01-02 2018 Frederic W. Ness Book Award AACU How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future? Matthew T. Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities. *Beyond the Skills Gap* challenges this conception of the skills gap, highlighting instead the value of broader twenty-first century skills in postsecondary education. They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy, society and students. Drawing on interviews with educators in two- and four-year institutions and employers in the manufacturing and biotechnology sectors, the authors demonstrate the critical importance of habits of mind such as problem solving, teamwork and communication. They go on to show how faculty and program administrators can create active learning experiences that develop students' skills across a range of domains. The book includes in-depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty-first century habits of mind. The study set in Wisconsin takes place against the backdrop of heated political debates over the role of public higher education. This thoughtful and nuanced account, enriched by keen observations of postsecondary instructional practice, promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary

faculty and administrators     Studies in Education ,1928     *How College Students Succeed* Nicholas A. Bowman,2023-07-03 Receiving a college education has perhaps never been more important than it is today While its personal societal and overall economic benefits are well documented too many college students fail to complete their postsecondary education As colleges and universities are investing substantial resources into efforts to counter these attrition rates and increase retention they are mostly unaware of the robust literature on student success that is often bounded in disciplinary silos The purpose of this book is to bring together in a single volume the extensive knowledge on college student success It includes seven chapters from authors who each synthesize the literature from their own field of study or perspective Each describes the theories models and concepts they use summarizes the key findings from their research and provides implications for practice policy and or research The disciplinary chapters offer perspectives from higher education public policy behavioral economics social psychology STEM sociology and critical and post structural theory     Change and Improvement in School-University Partnership Settings: Emerging Research and Opportunities Catelli, Linda A.,2021-02-12 Now more than ever the collaboration of researchers and practitioners from both PreK 12 and higher education in partnership and in research is imperative for solving problems in teaching and learning and for instituting fundamental change in education There is growing empirical work on educational change and improvement in school university partnership settings that should be explored This applied research and research design impacts the initiation and institution of change in partnership settings Thus the role of research is an essential lever for reform Practical perspectives are necessary to share for shaping a future in partnerships and to promote collaborative action and inquiry in school university and professional development partnership settings This includes changes in the partnerships classroom teaching in school and college policies student outcomes course content and in partnerships teacher education programs Change and Improvement in School University Partnership Settings Emerging Research and Opportunities spotlights the types of research research designs and exemplar studies that were successful in producing changes and improvements in the longitudinal partnerships the author founded and directed The chapters reveal what worked and why it worked along with brief descriptions of the exemplar studies that served as catalysts for change In addition a brief history of the partnership movement in America is given along with an overview of the current landscape of the different types of education partnerships prevalent today and their key research features This book is ideal for researchers scholars teacher researchers change agents professors teacher educators students and graduate fellows interested in conducting practical and effective applied research for change and improvement in school university partnership settings     **Resources in Education** ,1984

*The Rise of Women in Higher Education* Gary A. Berg,2019-11-28 The story of the American university in the past half century is about the rise of women in participation as students faculty members college athletes and in subsequently changing the overall university culture for the better Now almost sixty percent of the overall college student population in

America is female and still growing By the year 2000 women surpassed men worldwide in attendance at higher education institutions At the same time after years of a disproportionate dominant male professoriate female faculty members are now becoming the majority of university professors While top university presidents are still largely male women have achieved real gains in the overall administrative ranks and trustee positions In all areas of the university disparities still exist in terms of compensation and balance in key areas of the academy but the overall positive trend is clear Few to this date have recognized and chronicled this extraordinary change in college education one of society s fundamental and influential institutions For universities the test for the future is to make the changes needed in broad areas within higher education from financial aid to curriculum student activities and overall campus culture in order to better foster a newly empowered majority of women students
