## Organisms & Evolution

**Microbiology:** The study of living things too small to see with the naked eye

- The four main divisions of life are Bacteria, archaea, eukaryotes, and viruses
- Each division's DNA is more similar to its own than to any of the other three

Characteristic	Bacteria	Archaea	Eukaryotes	Viruses
Size	0.2 - 10 micrometers	0.2 - 10 micrometers	1 - 100 micrometers	0.02 - 0.2 micrometers
Nucleus	No	No	Yes	No
Genetic information	DNA	DNA	DNA	DNA or RNA
Signal receptor	Yes	Modified	Yes	None
Reproduction	Binary fission	Binary fission	Large	No
Membrane-bound organelles	No	No	Yes	No
DNA polymerase	Single, 3 subunits	More complex, 4 subunits	More complex, 12 subunits	Depends on the genetic material
Grow without sunlight	Yes	Yes	Yes	No
Membrane number of cells	1	1	Many	Non-cellular
Cell wall	Peptidoglycan	Several different types	Cellulose, chitin, or other	None

### Bacteria

- Most life on Earth is Bacteria
- Over 100,000 different species (major group)
- Are the most abundant form of life
- Many Bacteria are pathogenic, growing inside hosts that they harm
- Extremely diverse
- There are thousands of different species in one gram of soil
- Live in most environments, including on land, in the deep sea, and underground

### Archaea

- Relatively unknown with fewer known species
- Most common in extreme environments (e.g., deep sea vents and high-salt lakes)
- Contains some features of prokaryotes and eukaryotes
- Often found in extreme environments, e.g., high-salt lakes, hot springs, and deep-sea vents
- Many Archaea are extremophiles, e.g., thermophiles, halophiles, and acidophiles

### Eukaryotes

- May be single cells (e.g., yeast, algae, and amoeba) or multicellular (e.g., fungi, plants, and animals)
- Contain membrane-bound organelles that separate specific functions, particularly the nucleus
- Contains many microscopic organisms previously belonging to the Bacteria kingdom

### Viruses

- Many feel viruses are not alive as they are obligate parasites and cannot replicate without other cells
- Different viruses target different species
- Viruses may use DNA or RNA as genetic material and use molecules from the host cell to make more virus particles, ultimately killing the host

## Shapes & Types

### Bacterial & Archaeal Cell Shapes

- Cocci: Spherical
- Bacilli: Rod-shaped
- Spirilla: Spiral-shaped
- Phenomenon: Multiple shapes are possible

#### Cocci

#### Bacilli

#### Mutating and appendaged bacteria

#### Others

### Growth Characteristics

- Diphen: Prefix meaning two; a diphenon is two cells that have grown together
- Strept: Prefix meaning chain; a streptococcus is a chain of cells that have grown together
- Sarcina: Prefix meaning cube; a sarcina is a cube of cells that have grown together
- Spirilla: Prefix meaning spiral; a spirillum is a spiral-shaped bacterium
- Flagella: Prefix meaning whip; a flagellum is a whip-like structure used for movement

### Eukaryotic Types

- Ciliates: Microscopic organisms used for locomotion and feeding
- Flagellates: Long flagella used for locomotion, usually there are only one or two per cell
- Microcysts: Single cells, living in a protective environment (e.g., under leaves in a forest) that come together during replication

- Amoeba: One-celled organism that can change its shape and engulf its prey
- Fungi: Non-plant, non-animal organisms (e.g., yeasts and mushrooms)
- Algae: Photosynthetic organisms with a nucleus and chloroplasts. Many are single cells, others are multicellular, but many forms are still microscopic (e.g., diatoms)
- Protozoa: Photosynthetic eukaryotes with a nucleus and cell wall (e.g., diatoms)
- Spores: Eukaryotic, single-celled, round fungus
- Mould: Multicellular fungus which forms hair-like projections (hyphae) that may contain spores (e.g., penicillin)

## College Textbook Study Guides:

**College and University Writing Essentials** Robert Truscott, 2013-01-01 REA's Essentials provide quick and easy access to critical information in a variety of different fields ranging from the most basic to the most advanced. As its name implies, these concise comprehensive study guides summarize the essentials of the field covered. Essentials are helpful when preparing for exams, doing homework, and will remain a lasting reference source for students, teachers, and professionals.

**College and University Writing** covers reading skills, the active reading process, basic composition, narration in the first or third person, writing about literature, images, metaphors, and symbols, themes in literature, research assignments, and creative writing.

**Study Guide and Lecture Notebook** CORNELL Notes T H I E V E S study method College High School Lecture Notes Study Skills Workbooks Test Preparation Instruction Methods Subject Notebooks This academic STUDY GUIDE AND LECTURE NOTEBOOK provides an academically based organizational layout for the high school or university student to write vital information about the course topic, keep track of point of contact information for the instructor and class peers, as well as to study using a blend of proven study methodologies including the following systems:

The Cornell Notes method provides a system to condense, organize lecture notes by dividing the note-taking into two columns: pages for the note-taking column (usually on the right) with notes for summarizing lecture notes (pages on the left-hand side). The summarization page allows the student to quickly summarize key points from the lecture notes on the right page to bullet points on the left page.

The Textbook review section uses the T H I E V E S study strategy where the student/learner reviews and summarizes the information in the course textbook with notes broken out into T (title), H (headings), I (introduction), E (every paragraph first sentence), V (visuals), vocabulary, summarizing what the graphics are representing, E (end of chapter questions), S (summarize the entire chapter's content).

**How to Use the Study Notebook** The student will take notes on the right-hand pages marked "Lecture notes in class." It is best to not try to write word for word but to note the high points of the important topics of the lecture. When finished during a study session, the student will go back to the notes and using the left-hand page summarize important points by listing points that may have been missed in class but are present in the textbook or the instructor's worksheets from class.

Before or after the class lecture, the student will use the T H I E V E S system to summarize the information in the textbook, writing out vocabulary words and definitions and answering the questions in the back of the chapter, rewriting the questions incorporated into the answer.

If the student has any questions from the textbook or lecture notes, they need to ask the instructor to expand upon in the next lecture; they can write those in the specific page for that purpose.

If the instructor provides specific sources, references, or citations in class, the student can note those on the same page.

The pages are placed oddly in the layout of the book. This enables the student to open the notebook and have in-class lecture notes face the summary page to avoid having to flip the pages back and forth for information.

Textbook study pages are marked with a dark

triangle in the top right hand side of the page to help students quickly find textbook specific note pages in the notebook Key Words to search for this and similar study notebooks Academic Academic aid Academic notebook Blank notebook Class Notebook Class Organizer Cornell Notes organizer Course Organizer Education Education Teaching Educational Study Aids Lecture Notes Lecture Organize Notebook School notebook Study Aid Study Aids Study Guide Study methods Study notebook Language Arts Study Organizer Textbook study Textbook study methods CORNELL Notes THIEVES study method T H I E V E S study method College High School Study Skills Workbooks Test Preparation Instruction Methods Subject Notebooks
