

The Five Ways

For most students who go to college, the increase in their lifetime earnings far outweighs the costs of their education. That's a powerful argument for college. But more income is by no means the only positive outcome you can expect. The knowledge, fulfillment, self-awareness, and broadening of horizons that come from a college experience can transform your life — and the lives of those around you — in other equally valuable ways. More security, better health, closer family and stronger community, in addition to greater wealth, are the real value of a college education.

GREATER WEALTH

I will buy a car. A home. The latest fashions. I will travel the world.

MORE SECURITY

I will stand on my own two feet. I will be able to take care of my family through both good times and bad.

BETTER HEALTH

I will have the energy to juggle work and family. To keep up with my friends. To enjoy the world around me.

CLOSER FAMILY

I will pass my experiences on to my children. I will inspire them to achieve even more than I do.

STRONGER COMMUNITY

I will bring people together. I will speak on their behalf. I will make change happen.

The Evidence Liberal Arts Needs Richard A. Detweiler, 2021-11-23 Empirical evidence for the value of a liberal arts education how and why it has a lasting impact on success leadership altruism learning and fulfillment In ongoing debates over the value of a college education the role of the liberal arts in higher education has been blamed by some for making college expensive impractical and even worthless Defenders argue that liberal arts education makes society innovative creative and civic minded But these qualities are hard to quantify and many critics of higher education call for courses of study to be strictly job specific In this groundbreaking book Richard Detweiler drawing on interviews with more than 1 000 college graduates aged 25 to 65 offers empirical evidence for the value of a liberal arts education Detweiler finds that a liberal arts education has a lasting impact on success leadership altruism learning and fulfillment over a lifetime Unlike other defenders of a liberal arts education Detweiler doesn't rely on philosophical arguments or anecdotes but on data He developed a series of interview questions related to the content attributes of liberal arts for example course assignments and majors the context attributes out of class interaction with faculty and students teaching methods campus life and the purpose attributes adult life outcomes Interview responses show that although both the content of study and the educational context are associated with significant life outcomes the content of study has less relationship to positive adult life outcomes than the educational context The implications of this research Detweiler points out range from the advantages of broadening areas of study to factors that could influence students decisions to attend certain colleges

Collective Unravelings of the Hegemonic Web Becky L. Noël Smith, Katherine Becker, Libbi R. Miller, Natasha S. Reid, Michele D. Sorensen, 2014-08-01 Collective Unravelings of the Hegemonic Web represents the culmination of work that emerged from 2013 Curriculum Pedagogy annual conference The notion of the hegemonic web is the defining theme of the volume In this collection authors struggle to unravel and take apart pieces of the complex web that are so deeply embedded into normative ways of thinking being and making meaning They also grapple with understanding the role that hegemony plays and the influence that it has on identity curriculum teaching and learning Finally scholars included in this volume describe their efforts to engage and undergo counter hegemonic movements by sharing their stories and struggles
