Contracts Stephanie Ben-Ishai, David R. Percy, Christine Boyle, John Mccamus, Robert Flanigan, 2009-06-30 In addition this book will teach students how to engage in analysis of areas of law where overlapping or conflicting values are at stake such as human rights law and property law by reflecting on a value fundamental to the law of contracts such as freedom of contract

*Contracts* John Philip Dawson, William Burnett Harvey, Stanley D. Henderson, Douglas G. Baird, 2013 With the appearance of the Tenth Edition this book enters its sixth decade Throughout its long history this casebook has relied on classic cases to capture the fundamental principles of contract law and this edition reinforces that tradition This new edition preserves and builds upon the book's distinctive character especially its use of canonical cases its sensitivity to the history and evolution of doctrine and its close attention to the legal consequences of breach The newly added cases show how the basic principles of contract law continue to apply across a wide range of transactions As before this edition eschews any distinctive take on the law of contracts and thus allows each teacher using the book a broad range of choice on what to bring in to channel or expand classroom discussion The most visible alteration in this edition is an expanded treatment of the important problem of contract interpretation A significant amount of new material has been added but the length of the book remains about the same This edition both covers recent developments and maintains a manageable length

**Aspiration and Reality in Legal Education** David Sandomierski, 2020-02-24 Contrary to conventional narratives about legal education *Aspiration and Reality in Legal Education* reveals a widespread desire among law teachers to integrate both theory and practice into the education of versatile and civic minded lawyers Despite this stated desire however this aspiration is largely unrealized due to a host of intellectual and institutional factors that produce a profound gap between what professors believe about law and the ideas they communicate through their teaching Drawing on interviews with over sixty law professors in Canada David Sandomierski makes two important empirical discoveries in this book First he establishes that contrary to a dominant narrative in legal education that conceives of theory and practice as oppositional the vast majority of law professors consider theory to be vitally important in preparing better lawyers Second he uncovers a significant gap between the realist theoretical commitments held by a majority of professors and the formalist theories they almost uniformly convey through their teaching and conceptions of legal reasoning Understanding the intellectual and institutional factors that account for these tensions Sandomierski argues is essential for any meaningful project of legal education reform

*Cases and Comment on Contracts* John Philip Dawson, William Burnett Harvey, Stanley D. Henderson, 1982

*Contracts* John Philip Dawson, William Burnett Harvey, Stanley D. Henderson, 2003 Setting the standard of excellence with its teachability this

classic casebook provides a focused and self contained course on contract law It covers the evolution of modern contract law and its history and remedies the customary distinction between rules and standards as devices for legal governance and the ongoing competition between the reliance idea and contract law s formal doctrines The forward thinking eighth edition gives greater attention to such subjects as arbitration as a substitute for litigation contract formation problems arising from new technology and the Uniform Commercial Code s Article 2 whose innovations are increasingly seen by courts as a source of general contract law This edition also more closely tracks the increasing relevance of contract law to at will employment the relationship of contract and tort and the expanding technique of the implied contract      **Contract** Ian Gordon Farlam,E.
