Chapter 7 Structural Organisation in Animals

- Multicellular organisms' cells are organized into tissues to perform various functions.
- **Tissue:** A collection of similar cells and intercellular substances that work together to perform a specific function.
- All complex animals are made up of just four basic tissue types.
- **Organ:** A collection of similar and dissimilar tissues in a living organism that have been organized and adapted to perform a common specific function, such as the heart, lung, kidney, or stomach.
- **Organ System:** A collection of organs that work together to perform a single function. Each has a specific function in the body and is made up of specific tissues.
