Econometrics Badi H. Baltagi, 2007-11-21 Here at last is the fourth edition of the textbook that is required reading for economics students as well as those practising applied economics Not only does it teach some of the basic econometric methods and the underlying assumptions behind them but it also includes a simple and concise treatment of more advanced topics from spatial correlation to time series analysis This book's strength lies in its ability to present complex material in a simple yet rigorous manner This superb fourth edition updates identification and estimation methods in the simultaneous equation model It also reviews the problem of weak instrumental variables as well as updating panel data methods

Theoretical and Empirical Exercises in Econometrics Nlandu Mamingi, 2005 This is a textbook designed for undergraduate and graduate students and is the result of the author's more than twenty years of involvement with econometrics as both teacher and researcher It contains theory problems and answers many of which have already been tested extensively in classrooms and tutorials and then refined for the book It includes the following topics single equation regressions dummy and limited dependent variable models simultaneous equations models dynamic regression models unit roots cointegration and error correction models aggregation over time issues forecasting and panel data models The book does not attempt to duplicate the many standard econometrics books Rather it supplements them by focusing exclusively on theoretical and empirical exercises in a systematic way Although much of the material has a Caribbean flavour its rigorous and clear presentation will appeal to students and teachers worldwide

Advances in Econometrics and Modelling B. Raj, 2013-03-09 During 1985-86 the acquisition editor for the humanities and social sciences division of Kluwer Academic Publishers in the Netherlands visited the University of Florida where I was also visiting while on sabbatical leave from Wilfrid Laurier University as the McKethan Matherly Senior Research Fellow to discuss publishing plans of the faculty He expressed a keen interest in publishing the proceedings of the conference of the Canadian Econometric Study Group CESG that was to be held the following year at WLU This volume is the end product of his interest endurance and persistence But for his persistence I would have given up on the project Most of the papers though not all included in this volume are based on presentations at CESG conferences In some cases scholars were invited to contribute to this volume where their research complimented those presented at these conferences even though they were not conference participants Since papers selected for presentation at the CESG conferences are generally the finished product of scholarly research and often under submission to refereed journals it was not possible to publish the conference proceedings in their entirety Accordingly it was decided in consultation with the publisher to invite a select list of authors to submit significant extensions of the papers they presented at the CESG conferences for inclusion in this volume The editor wishes to express gratitude to all those authors who submitted their papers for evaluation by anonymous referees and for making revisions to conform to our editorial process
