Personality and Cognition in Economic Decision Making Aurora García-Gallego, Manuel I. Ibáñez, Nikolaos Georgantzis, 2017-08-22 Psychologists studying cognitive processes and personality have increasingly benefited from the wealth of theory methodology and decision making paradigms used in economics and game theory Similarly for the economists personality traits and basic cognitive processes offer a set of coherent explanatory constructs in economic behavior Given the debate on preference invariance and behavioral consistency across contexts and domains the papers in this topic shed light on the existence and effect of stable sets of idiosyncratic features on economic decision making While the effects of personality and cognition on economic decisions remain under explored the papers contributed in this topic offer more than a stimulus for further research The general message could be that personality and cognitive processes offer the stable idiosyncratic ground on which individual decisions are made [Japan's Effectiveness as a Geo-Economic Actor](#) Yuka Koshino, Robert Ward, 2022-03-27 Geo economic strategy deploying economic instruments to secure foreign policy aims and to project power has long been a key element of statecraft In recent years it has acquired even greater salience given

China's growing antagonism with the United States and the willingness of both Beijing and Washington to wield economic power in their confrontation. This trend has particular significance for Japan given its often tense political relationship with China which remains its largest trading partner. While Japan's post-war geo-economic performance often failed to match its status as one of the world's largest economies, more recently Tokyo has demonstrated increased geo-economic agency and effectiveness. In this Adelphi book Yuka Koshino and Robert Ward draw on multiple disciplines including economics, political economy, foreign policy and security policy and interviews with key policymakers to examine Japan's geo-economic power in the context of great power competition between the US and China. They examine Japan's previous underperformance, how Tokyo's understanding of geo-economics has evolved and given constraints on its national power projection, what actions Japan might feasibly take to become a more effective geo-economic actor. Their conclusions will be of direct interest not only for all those concerned with Japanese grand strategy and the Asia Pacific but also for those middle powers seeking to navigate great power competition in the coming decades.

Law and Economics of Personalized Medicine Karin Bosshard, 2018-05-14. The book adds to the discussion about strategic approaches towards the translation of personalized medicine into clinical practice. It stresses the importance of non-science related institutional barriers. A Law and Economics perspective is applied in order to examine the incentives induced by the barriers. An applied part identifies and evaluates policy levers to foster the translation of personalized medicine into Swiss clinical practice.

Economics and the Environment Eban S. Goodstein, Stephen Polasky, 2017-10-19. Climate change has morphed from an environmental problem into a challenge to civilization itself. As CO₂ levels have continued to rise, the 8th Edition of this book is now more relevant than ever. Retaining the approach of the original edition, the newest iteration features global warming as the framing example for a comprehensive look at environmental economics. Pedagogical clarity is ensured by the book's central focus on four highly focused questions: How much pollution is too much? Is the government up to the job? How can we do better? How can we resolve global issues? The text also continues with a strong focus on natural resources, economics and ecosystem services. Updates to the book are included to address the very latest concerns, standards and legislation related to environmental issues, providing students with a comprehensive look at this important topic while maintaining an accessible approach that makes the material engaging and highly relevant.
