DNA Nanoscience Kenneth Douglas, 2016-10-14 DNA Nanoscience From Prebiotic Origins to Emerging Nanotechnology melds two tales of DNA One is a look at the first 35 years of DNA nanotechnology to better appreciate what lies ahead in this emerging field The other story looks back 4 billion years to the possible origins of DNA which are shrouded in mystery The book is divided into three parts comprised of 15 chapters and two Brief Interludes Part I includes subjects underpinning the book such as a primer on DNA the broader discipline of nanoscience and experimental tools used by the principals in the narrative Part II examines the field of structural DNA nanotechnology founded by biochemist crystallographer Nadrian Seeman that uses DNA as a construction material for nanoscale structures and devices rather than as a genetic material Part III looks at the work of physicists Noel Clark and Tommaso Bellini who found that short DNA nanoDNA forms liquid crystals that act as a structural gatekeeper orchestrating a series of self assembly processes using nanoDNA This led to an explanation of the polymeric structure of DNA and of how life may have emerged from the prebiotic clutter

Bridging Complexity and Post-Structuralism Minka Woermann, 2016-09-27 This work addresses the topic of philosophical complexity which shares certain assumptions with scientific complexity cybernetics and General Systems Theory but which is also developing as a subject field in its own right Specifically the post structural reading of philosophical complexity that was pioneered by Paul Cilliers is further developed in this study To this end the ideas of a number of contemporary French post structural theorists and their predecessors including Derrida Nancy Bataille Levinas Foucault Saussure Nietzsche Heidegger and Hegel are introduced The implications that their various insights hold for our understanding of complex human systems are teased out at the hand of the themes of economy social ontology subjectivity epistemology and ethics The analyses are also illuminated at the hand of the problematic of the foreigner and the related challenges of showing hospitality to foreigners The study presents a sophisticated account of both philosophical complexity and philosophies of difference By relating these subject fields the study also extends our understanding of philosophical complexity and offers an original characterisation of the aforementioned philosophers as complex thinkers
