I've picked WordPress because I've been using it to build and manage my friends' blogs, clients, and my own websites since 2006. I'll keep recommending WordPress because it's very easy to use and yet powerful enough to do what you set your mind to by using any of the free or paid plugins and themes developed by an active international community of WordPress enthusiasts. Over 100 million websites are using WordPress. They can't all be wrong, right? And did I say you don't need coding skills to build your own website? I've said it, and you may hear it a couple of times more from me because that's an important part of the reason I've started writing this book. Most people assume you need some sort of programming knowledge to build a website, but the reality is there are plenty of free tools you can use to go online with just a few easy clicks.
