Collaborating for Real Literacy Sharon M. Pitcher, Bonnie Mackey, 2013-03-21 Advances in literacy require collaboration between all of a school's stakeholders. This book harnesses the latest research and takes into consideration CCSS to show how to make that collaboration a reality. Authentic literacy practice is crucial to preparing all students to be successful both in the workplace and college in the 21st century. Insisting that this literacy achievement will only happen when librarians, teachers, literacy coaches, and administrators work together in their schools, *Collaborating for Real Literacy* addresses the role of each instructional leader individually and examines the importance of the group collectively in bolstering the literacy of all students. Practical ways to support the teaching of the Common Core State Standards (CCSS) are infused throughout every chapter. In this second edition of the book, core chapters on scaffolding literacy, centers, family literacy, English language learners, comprehension, assessment, writing, and discussion have been updated based on current research and CCSS. Each of these chapters now offers suggestions for literacy coaches. Also new are recommendations for grades K-5 and 6-12 demonstrating specific ways to apply instructional ideas to different age levels and providing materials that can be used for the instruction. Additionally, three new chapters have been added with real literacy instructional ideas for content area reading and Response to Intervention support for struggling readers.

Searching 2.0 Michael P. Sauers, 2009 This book will show one in simple, non-technical terms how to integrate the invisible Web into teaching opportunities wherever they occur in a one-on-one teaching moment at the reference desk or in a formal course. Estimated at 500 times the size of the visible Web, the invisible Web and the search skills needed to plumb its depths should be a part of every information literacy and research skills course. With this book, one gets expert teaching tips and scripts for informal instruction plus model activities and assignments for the classroom. Statistics and summaries of relevant research will help one combat myths like "Searching Is Easy" or "Everything Important Is Free." Read this book too to find out how the best deep Web search tools, including CompletePlanet, Closer Look, and the Librarians' Internet Index, are evolving and what it all means for one's library's future electronic collection development plans.
