subjects of faith and belief religions online religions on the Net or religions in cyberspace Rather it is a book about religious

and spiritual experience under the rubric cyber worship which is the variety of ways religious devotion is performed and

carried out on the Internet The term Cyber Worship is a catchall phrase which includes variants such as online worship

virtual worship electronic prayer cyber puja cyber synagogue and so on Dr Mohamed Taher has thus assembled a quick

reference for two groups those communities that are involved in Cyber Worship and business Webs that collaborate in

sustaining wired environments As such this book provides an interesting and current perspective on a practice that will

Law,2015-09-03 This volume looks at research methods through the lens of peace studies and peace values Apart from

reviewing established methods from peace psychology it presents some innovative ideas for conducting research in the area

of peace psychology Many of these methods are drawn from the field from activities used by active peace practitioners A

critical component of this volume is its core argument that peace research should be conducted by peaceful means and

should model peaceful processes Organized thematically the volume begins with a review of the established best practices in

peace psychology research methodology including methods for qualitative research for quantitative research and

participative action networks In doing so it also points to some of the limitations of working for peace within the tradition of a

single discipline and to the need to expand psychology methodology to methodologies Therefore the second half of the

volume proceeds to explore the realm of innovative relatively unorthodox research methods such as participatory and

workshop methods the creative arts and sports for research purposes The use of new advances in information technology to

conduct peaceful research are also discussed The concluding chapters synthesize key issues from the previous chapters and

links peace psychology with ideas and implementation of research designs and practices Finally it discusses the nature of

academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to

build a more peaceful world Overall this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research Many researchers find the experience of doing research a somewhat lonely if not isolating experience Methodologies in Peace Psychology Peace Research by Peaceful Means aims to alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference in addition to encouraging more reflection and analysis for experienced peace psychologists **Critical Theory and Transformative Learning** Wang, Viktor, 2018-06-04
