Softwhere Joseph Halligan,1984 Making Math Accessible for the At-Risk Student Linda Lee Ptacek,2011-01-14 This invaluable collection of activities and strategies will empower teachers to help students who are struggling with math Every day secondary math teachers face classrooms containing students with a wide range of abilities yet each child is expected to meet the same testing standards Special education teachers are often asked to collaborate in classrooms outside of their curricular areas providing accommodations and modifications Both math teachers and special education instructors can benefit from effective alternative presentation strategies specifically designed for students struggling with math Making Math Accessible for the At Risk Student comprises organizational instructional and motivational activities that are adaptable across grade levels This cornucopia of best practice strategies and resources is designed to help at risk students achieve standards in math The first six chapters discuss the most common reasons adolescent and preadolescent students struggle with math and present techniques to keep these students engaged in the classroom The remainder of the book is a treasure trove of activities that utilize the instructional strategies with specific content to help all students succeed *Maple and Mathematica* Inna K. Shingareva,Carlos Lizárraga-Celaya,2010-04-29 In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications Let us look at some examples the history of computing the number began in Egypt and Babylon about 2000 years BC since then many mathematicians have calculated e g Archimedes Ptolemy Vi ete etc The first formula for computing decimal digits of π was discovered by J Machin in 1706 who was the first to correctly compute 100 digits of π Then many people used his method e g W Shanks calculated with 707 digits within 15 years although due to mistakes only the first 527 were correct For the next examples we can mention the history of computing the ne structure constant that was first discovered by A Sommerfeld and the mathematical tables exact lutions and formulas published in many mathematical textbooks were not verified rigorously 25 These errors could have a large effect on results obtained by engineers But sometimes the solution of such problems required such technology that was not available at that time In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable Therefore the computers can be used to verify the results obtained by humans to discovery new results to provetheresultsthat a human can obtain without any technology With respect to our example of computing we can mention that recently in 2002 Y Kanada Y Ushiro H Kuroda and M **Algebra: The Easy Way** Douglas Downing,2019-09-03 A self teaching guide for students Algebra The Easy Way provides easy to follow lessons with comprehensive review and practice This edition features a brand new design and new content structure with illustrations and practice questions An essential resource for High school and college courses Virtual learning Learning pods Homeschooling Algebra The Easy Way covers Numbers Equations Fractions and Rational Numbers Algebraic Expressions Graphs And more InCider ,1991 **Parallel Symbolic Computation Pasco '94 - Proceedings Of The First International Symposium** Hoon Hong,1994-09-17 These

Experiments In Mathematics Using Maple Christopher T.J. Dodson,Elizabeth A. Gonzalez,2012-12-06 We believe that to understand and be comfortable with mathematical concepts and methods it is necessary to do mathematics and traditionally doing meant with a pencil and paper Now a modest home computer can provide a platform for a computer algebra package like Maple which can perform all of the operations encountered in secondary school mathematics and beyond and provide graphical representations of functions including animations The capability of rendering accurate graphics for mathematical functions greatly enhances the learning experience and helps intuition work in new situations before beginning to do the algebra and calculus needed to solve a problem For example if you can see that a function has a clear minimum from its graph then you are more likely to be able to identify its location precisely by analysis This book is designed to support the interactive Maple worksheets that we have developed for the two senior secondary school years and made available via the Internet at the anonymous ftp site ftp.utoronto.ca/pub/ednet/maths/maple This takes you from basic algebra functions and sequences to calculus and its applications Thus the book is a hardcopy version of the worksheets with additional explanatory text cross referencing appendices containing worked solutions to all exercises and indexing
