

Choosing Parts For Building a PC

A Quick/Beginner's Guide

Motherboard

Minimum: \$60 range. Does the trick and is also inexpensive; for older CPU's.

Middle of the Road: \$60 to \$110. A step up from the minimum; many combos that include a CPU come in this price range.

High-End: \$100 to \$200. Good for a powerful game or video workstation. More speed and up-to-date; can handle the latest CPU technology.

Extreme: Over \$200. Bells and whistles. Things like multiple CPU sockets, extra memory slots, special cooling features, etc.

CPU

AMD: Bang for your buck. More affordable, slightly less reliable in some aspects. Generally runs hotter than Intel, which can be a problem.

Intel: Expensive; reliable, runs cooler than AMD.

Your CPU should come with a "heatsink"—cooling fan—unless the specs say OEM, then you won't get one. You need it.

Power Supply

Minimum: 300 watt power supply. Good for most instances.

More: Above 300 watt. For a computer with multiple video cards or hard-drives. Read hardware specs to find out if you need it.

Ram/Memory

2 GB: At least. You don't mind waiting for things to load, and you don't open many windows/tabs at the same time.

4GB: Faster. Less waiting. "I'll be there."

8GB: Serious image/video editing, gaming. No noticeable performance changes above this benchmark.

Graphics Card

Cheap: Up to \$125. No frills. Watch videos and do basic image editing.

Middle of the Road: Between \$150 and \$200; the tried and true price range. Safe and reliable performance.

Extreme: Over \$200. Need to do some serious gaming or image/video editing? Buy this.

USB Ports

A **minimum** of four; mouse port, keyboard port, two extra. If you want multiple connections at the same time make sure your motherboard has the amount of ports needed.

Hard-Drive

Minimum: 150GB. Space for files as well as speed. Your computer slows down as you fill up your hard-drive.

Better: 300GB and above. Takes a long time to fill up and computer runs faster.

Best: Solid State. No moving parts. Available in combos with old technology for affordability. Very expensive.
