- When you are satisfied with a combination of continents to move, click the map "Map of the world continents"

3. Study world's super map of Pangaea

- How will do the continents fit together?

They fit pretty well, but I don't think that this is what Pangaea looked like and there are gaps on the map

- Is it possible to fit together

Yes, this is a perfect example of all the continents fitting well and it is a perfect fit because most of the gaps are from other things

- How does the world map get from where they were to where they are today? There is some evidence that the continents could have moved like that

Yes, they could have moved like this because all the pieces look like they fit together. This is possible when the continents could have moved because of the water pushing it like by 1960

- Compare Pangaea's present super map of Pangaea to your observations and theories - with a different map, and make about each one
