Handbook of Bullying in Schools Shane R. Jimerson, Susan M. Swearer, Dorothy L. Espelage, 2009-12-04 The Handbook of Bullying in Schools provides a comprehensive review and analysis of what is known about the worldwide bullying phenomena. It is the first volume to systematically review and integrate what is known about how cultural and regional issues affect bullying behaviour and its prevention. Key features include the following: Comprehensive forty one chapters bring together conceptual, methodological and preventive findings from this loosely coupled field of study thereby providing a long needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner. International Focus approximately forty percent of the chapters deal with bullying assessment, prevention and intervention efforts outside the USA. Chapter Structure to provide continuity chapter authors follow a common chapter structure: overview, conceptual foundations, specific issues or programs and a review of current research and future research needs. Implications for Practice a critical component of each chapter is a summary table outlining practical applications of the foregoing research. Expertise the editors and contributors include leading researchers, teachers and authors in the bullying field, most of whom are deeply connected to organizations studying bullying around the world.

Bullying in Youth Sports Training

Miguel Nery, Carlos Neto, António Rosado, Peter K. Smith, 2020-02-13 Based on an extensive national research project with global relevance, this pioneering volume draws on unique data on bullying in youth sports training collected from both athletes and coaches using a variety of methodological approaches. Nery, Neto, Rosado and Smith use this research to establish a baseline of the prevalence of bullying among young male athletes, offering evidence based strategies for prevention and providing a solid theoretical basis for the development of anti bullying intervention programs. *Bullying in Youth Sports Training* explores how often bullying occurs, how long it lasts, where and when bullying takes place, the coping strategies used by victims and the individual roles of victims, bystanders and bullies. It provides new insights into theories of youth sport bullying and highlights the particular characteristics specific to bullying in sport. The backgrounds of bullies and victims are also explored, as well as the consequences and practical implications of sustained bullying. The book provides both theoretical and practical approaches to bullying in youth sport training, providing anti bullying guidelines based on the results of the research. The book is essential reading for scholars and students in child development and sport sciences, as well as sports coaches and professionals in mental health, education and social work.
