

If you are parked on a steep incline, begin your descent in Low Range. The transmission will be in first speed gear (low-wheeling). After car speed is above 7 miles per hour, the shift from first speed to second speed can be accomplished by depressing the clutch pedal momentarily and releasing it, in which case, the transmission will shift automatically to second gear.

### REVERSE

To use the reverse gear (with the car stopped), depress the clutch pedal, then, lift the gearshift lever up toward the steering wheel and push it forward. Release the clutch pedal gradually and accelerate as required.

### STARTING IN SNOW, MUD OR ON SLIPPERY PAVEMENTS

Better traction can be obtained from the Fluid-Matic Drive Transmission when starting in snow, mud or on slippery pavements, by shifting into High Range. The car will start out in third speed which is low enough to give sufficient starting power, yet high enough to avoid spinning the wheels.

### STOPPING ON ICE

Apply the brakes gently and incrementally when stopping on a slippery pavement. The idea is to keep the wheels from sliding, since rolling wheels have better traction.

### PARKING ON A GRADE

When parking on a grade, crank the wheels to the curb and apply the hand brake tightly.

### EXTENDED STOPS

If the car is to be allowed to stand, with the engine running, for longer than the ordinary traffic light duration, move the gearshift lever to the neutral position.

### TO STOP THE CAR AND ENGINE

Release the accelerator pedal and apply the foot brakes so as to stop the car smoothly. After bringing the car to a stop, depress clutch pedal and move the gearshift lever to the neutral position, set the hand brake, release the foot brakes and remove the ignition key.

## THE STANDARD SHIFT TRANSMISSION

Shifting the Standard Shift Transmission is easy. The position of the gearshift lever—attached to the steering column—simplifies manual operation.

To go into first speed forward, depress the clutch pedal, raise the shift lever toward the wheel and pull back. (Push the lever forward for reverse.) Spring pressure holds the shift lever away from the steering wheel, so that only when entering low or reverse gear is it necessary to raise the lever toward the wheel.

When shifting from first to second, merely depress the clutch pedal and push gearshift lever forward to second speed position, when shifting from second to third gear, depress clutch pedal and pull the lever back.

When going up a hill with the Standard Shift Transmission, don't force the engine to labor by leaving the transmission in high gear; shift back into second or, should the hill be exceptionally steep, into first.

When going down a steep grade, use the engine in backing the car speed by shifting into second gear or, if exceptionally steep, into first.

## RETAINING THAT ORIGINAL SHOWROOM LOOK

You can keep your car looking like new with very little trouble. The following paragraphs are suggestions to aid you in this and for your convenience your Chrysler Dealer carries a complete line of cleaners, polishes, lubricants and other like material.

### WASHING THE CAR

You can retain the lasting beauty of the high luster, hard-baked enamel finish of your new Chrysler by washing frequently with plenty of cool water. Saturate the dirt on the finish with water before proceeding with the actual washing operations. For best results, use a clean sponge and running water and rinse sponge often. Dry to a high polish with a clean, damp chamois skin. Avoid washing the car in strong sunlight or when enamel surfaces are hot. Never use hot water.

If the paint surface is not kept clean, the action of the elements and accumulation of dirt, road grime, corrosive salts, etc., will eventually cause damage to the finish and also present a very unattractive appearance. The more frequent washings will eliminate the necessity of using a wax or polish. Paste type cleaners or harsh abrasive type liquid cleaners should never be used, as their abrasive action will permanently dull the finish.

Tar or road oil should be removed before washing with a suitable solvent such as MOPAR Tar and Road Oil Remover.

### TO MAKE WINDOWS SPARKLE

Window glass can be cleaned crystal clear with MOPAR Glass Cleaner. Simply spray it on and wipe off.

### CHROME AND STAIN-RESISTING STEEL

Rust or tar can be quickly removed with MOPAR Chromium Polish.
