Accessories

Winch

The winch is an accessory that may be applied to the crane (or to the fly-jib) making it possible to move loads by winding/unwinding a cable around a rotating drum equipped with a hydraulic safety brake. The accessory therefore makes it possible to improve the possibilities movements of the crane. Since it is a hydraulic device, its application requires that the crane be equipped to support it and it must be connected to rapid fittings ed elettrici.

The fitting of this accessory onto the crane must be carried out according to general safety rules stated in chapter "2 - Safety rules and notes".

The accessories described in this section are a **general list**. Refer to the specific instructions according to the crane model, version and configuration purchased.

In case of difficulties in identifying the exact configuration purchased or for explanations regarding the instructions for use, **do not hesitate to contact** your dealer / or your service network.

General description

The main installation elements include:

winch (A)

transmissions (B): applied in certain points of the crane to guide the cable correctly **(THEY MAY NOT BE PROVIDED)**

transmission head (C): applied to the end of the crane, to transmit the crane cable vertically to the load

electric and-stroke device (D): fitted on EEC-crane only

counter-weight (E): applied to the end of the cable, to keep the cable under constant tension so prevent it from being damaged while winding/unwinding, and especially in the absence of handling load

rope block (F): this allows lifting with a number of pulls* greater than one

hook (G)

Transmission head, transmissions and rope block are all marked with their own weight if greater than 30Kg.

* direct pull (number of pulls=1) this means that the load is hung directly from the cable, while 2 pulls, 3 pulls, etc. means that the load is hanging from a rope block with 2, 3, etc. cable lines.
