Efficiency And Logistics Lecture Notes In Logistics:

Efficiency and Logistics Uwe Clausen, Michael ten Hompel, Matthias Klumpp, 2012-10-06 The EffizienzCluster LogistikRuhr was a winner in the Leading Edge Science Cluster competition run by the German federal Ministry of Education and Research. The mission and aim of the EffizienzCluster LogistikRuhr is to facilitate tomorrow's individuality in the sense of individual goods supply mobility and production using 75 percent of today's resources. Efficiency both in economical and ecological terms is enabled by state of the art and innovative logistical solutions including transportation production and intralogistics. These proceedings Efficiency and Logistics give first answers from 27 research projects as an insight into the current state of research of Europe's leading research and development cluster in logistics and as a contribution to the discussion on how logistics as a science can help to cope with foreseeable resource shortage and sustainability as global challenges. *Pioneering Solutions in Supply Chain Performance Management* Thorsten Blecker, Wolfgang Kersten, Christian M. Ringle, 2013-08-22 As competition between value chains on globalized markets is constantly getting fiercer there is a growing trend to achieve closer collaboration and integration within these value chains and increasingly more complex supply networks. Additionally in the wake of the thrilling possibilities of using information technology and its potential in boosting the performance of supply chains researchers are increasingly looking for technology enabled solutions for a better supply chain performance management. This volume edited by Thorsten Blecker, Wolfgang Kersten and Christian Ringle provides valuable insights into Maritime Logistics Challenges and Opportunities Leveraging Logistics Processes for Supply Chain Performance Management Innovative Technology Solutions in Supply Chains Knowledge Management in Logistics. This volume appeals to researchers and practitioners alike who are interested in current contributions by international authors providing theoretical empirical and case study oriented background and information on their research work. **Efficiency and Innovation in Logistics** Uwe Clausen, Michael ten Hompel, J. Fabian Meier, 2013-08-16 The importance of logistics in all its variations is still increasing. New technologies emerge new planning methods and algorithms are developed only to face a market with a growing complexity and the need of weighting monetary costs against ecological impact. Mastering these challenges requires a scientific viewpoint on logistics but always with applications in mind. This volume presents up to date logistics research in all its diversity and interconnectedness. It grew out of the International Logistics Science Conference ILSC held in Dortmund in September 2013 bringing together leading scientists and young academics from nine different countries. The conference was jointly organized by the Efficiency Cluster Logistics and the Fraunhofer Institute for Material Flow and Logistics. The Program Committee used a double blind review process to choose the 12 strongest contributions which were then grouped in four areas: Sustainability logistics including electric mobility smart information communication technologies and corporate social responsibility management; Intralogistics including the detection of autonomous vehicles 3D computer vision and sensor functions for forklift trucks; Transport logistics including distribution centre organization

Kim,Xiaoxia Huang,Yabe Hiroshi,2015-05-18 This volume provides a complete record of presentations made at Industrial Engineering Management Science and Applications 2015 ICIMSA 2015 and provides the reader with a snapshot of current knowledge and state of the art results in industrial engineering management science and applications The goal of ICIMSA is to provide an excellent international forum for researchers and practitioners from both academia and industry to share cutting edge developments in the field and to exchange and distribute the latest research and theories from the international community The conference is held every year making it an ideal platform for people to share their views and experiences in industrial engineering management science and applications related fields Innovative Computing Jason C. Hung,Jia-Wei Chang,Yan Pei,Wei-Chen Wu,2022-01-04 This book comprises select proceedings of the 4th International Conference on Innovative Computing IC 2021 focusing on cutting edge research carried out in the areas of information technology science and engineering Some of the themes covered in this book are cloud communications and networking high performance computing architecture for secure and interactive IoT satellite communication wearable network and system infrastructure management etc The essays are written by leading international experts making it a valuable resource for researchers and practicing engineers alike Recent Advances in Manufacturing Modelling and Optimization Shailendra Kumar,J. Ramkumar,Panagiotis Kyratsis,2022-04-21 This book presents the selected proceedings of 2nd International Conference on Recent Advances in Manufacturing RAM 2021 The book provides insights to current research trends and opportunities in modelling and optimization of manufacturing processes and systems The topics covered include modelling analysis computing and simulation traditional and non traditional optimization techniques surface coating methods additive manufacturing processes CAD CAM robotics and automation welding and joining processes supply chain management and CAE and reverse engineering This book will be a good reference for beginners researchers and professionals interested in modelling and optimization related to manufacturing engineering and related fields *Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012): Volume 5* Yuhang Yang,Maode Ma,2013-02-11 The objective of the 2nd International Conference on Green Communications and Networks 2012 GCN 2012 is to facilitate an exchange of information on best practices for the latest research advances in the area of communications networks and intelligence applications These mainly involve computer science and engineering informatics communications and control electrical engineering information computing and business intelligence and management Proceedings of the 2nd International Conference on Green Communications and Networks 2012 GCN 2012 will focus on green information technology and applications which will provide in depth insights for engineers and scientists in academia industry and government The book addresses the most

innovative research developments including technical challenges social and economic issues and presents and discusses the authors ideas experiences findings and current projects on all aspects of advanced green information technology and applications Yuhang Yang is a professor at the Department of Electronic Engineering Shanghai Jiao Tong University Maode Ma is an associate professor at the School of Electrical Electronic Engineering Nanyang Technological University

Recent Advances in Materials and Manufacturing Technology Ramesh Kumar Nayak, Mohan Kumar Pradhan, Animesh Mandal, J. Paulo Davim, 2023-07-04 This book presents the select proceedings of the 2nd International Conference on Advances in Materials and Manufacturing Technology ICAMMT 2022 The book covers the latest trends in existing and new materials manufacturing processes evaluation of materials properties for the application in automotive aerospace marine locomotive automotive and energy sectors The topics covered include advanced metal forming bending welding and casting techniques recycling and re manufacturing of materials and components materials processing characterization and applications multi physics coupling simulation and optimization alternate materials material substitution thermally enhanced processes and materials composites and polymer manufacturing powder metallurgy and ceramic forming numerical modeling and simulation advanced machining processes functionally graded materials non destructive examination optimization techniques engineering materials heat treatment material testing MEMS integration energy materials bio materials metamaterials metallography nanomaterial SMART materials and super alloys In addition it discusses industrial applications and covers theoretical and analytical methods numerical simulations and experimental techniques in the area of advanced materials and their applications It also covers the application of artificial intelligence in advanced materials and manufacturing technology The book will be a valuable reference for researchers and industry professionals alike

Operations, Logistics and Supply Chain Management Henk Zijm, Matthias Klumpp, Alberto Regattieri, Sunderesh Heragu, 2018-08-29 This book provides an overview of important trends and developments in logistics and supply chain research making them available to practitioners while also serving as a point of reference for academicians Operations and logistics are cornerstones of modern supply chains that in turn are essential for global business and economics The composition character and importance of supply chains and networks are rapidly changing due to technological innovations such as Information and Communication Technologies Sensors and Robotics Internet of Things and Additive Manufacturing to name a few often referred to as Industry 4.0 Societal developments such as environmental consciousness urbanization or the optimal use of scarce resources are also impacting how supply chain networks are configured and operated As a result future supply chains will not just be assessed in terms of cost effectiveness and speed but also the need to satisfy agility resilience and sustainability requirements To face these challenges an understanding of the basic as well as more advanced concepts and recent innovations is essential in building competitive and sustainable supply chains and as part of that logistics and operations These span multiple disciplines and geographies making them interdisciplinary and international Therefore this book

contains contributions and views from a variety of experts from multiple countries and combines management engineering as well as basic information technology and social concepts. In particular, it aims to provide a comprehensive guide for all relevant and major logistics operations and supply chain management topics in teaching and business practice. It addresses three levels of expertise: i.e. concepts and principles at a basic undergraduate BS level, more advanced topics at a graduate level MS, and finally, recent state-of-the-art developments at a research level. In particular, the latter serve to present a window on current and future potential logistics innovations in the different thematic fields for both researchers and top business practitioners. It integrates a textbook approach with matching case studies for effective teaching and learning, discusses multiple international perspectives in order to represent adequately the true global nature of operations, logistics, and supply chains.

Technologies and Trends in the Halal Industry Nor Aida Abdul Rahman, Kamran Mahroof, Azizul Hassan, 2023-11-22. With recent technological developments touted also as Industry 4.0, numerous articles published over the years have emphasized the need to investigate the role of technology across all sectors, including the halal industry. This book provides a greater understanding of the technologies, trends, and debates associated with the halal industry from different sectors such as food, logistics, pharmaceutical, tourism, medical, cosmetic, and the retail sector. The book adds substantial discussion to the issues and trends of technology applications in the halal industry as well as the theories underpinning halal technology studies. It is in four sections: an overview of the halal industry, selected theories, technology, and recent issues. The contributors explore how technology has evolved and been applied in industry and also look at how Industry 4.0 technologies like blockchain, Internet of Things (IoT), automation, machine learning, and augmented reality are being integrated in the halal supply chain process. Written by well-regarded scholars and international academics from Africa, Europe, Middle East, and Asia, this book provides expert contributions from research, regulatory, and industry perspectives. This book will interest upper-level students, scholars, academics, and practitioners in the various disciplines of tourism and travel, hospitality, food studies, marketing, pharmaceutical, and medical logistics management, Islamic studies, and information technology in the halal industry.
