Creation Care Discipleship Steven Bouma-Prediger, 2023-10-17 Although our planet faces numerous ecological crises including climate change many Christians continue to view their faith as primarily a spiritual matter that has little relationship to the world in which we live But Steven Bouma Prediger contends that protecting and restoring our planet is part and parcel of what it means to be a Christian Making his case from Scripture theology and ethics and including insights from the global church Bouma Prediger explains why Christians must acknowledge their identity as earthkeepers

and therefore embrace their calling to serve and protect their home planet and fellow creatures To help readers put an earthkeeping faith into practice he also suggests numerous practical steps that concerned believers can take to care for the planet Bouma Prediger unfolds a biblical vision of earthkeeping and challenges Christians to view care for the earth as an integral part of Christian discipleship **Cooler Smarter** Seth Shulman, Union of Concerned Scientists, 2012

Earthkeeping and Character Steven Bouma-Prediger, 2019-11-19 Addressing a topic of growing and vital concern this book asks us to reconsider how we think about the natural world and our place in it Steven Bouma Prediger brings ecotheology into conversation with the emerging field of environmental virtue ethics exploring the character traits and virtues required for Christians to be responsible keepers of the earth and to flourish in the challenging decades to come He shows how virtue ethics can enrich Christian environmentalism helping readers think and act in ways that rightly value creation *Fostering Habits of Mind in Today's Students* Jennifer Fletcher, Adela Najarro, Hetty Yelland, 2023-07-03 Co published with and Students need more than just academic skills for success in college and career and the lack of an explicit instructional focus on the soft skills critical to postsecondary success poses a challenge for many students who enter college especially the underprepared Based upon a multi campus cross disciplinary collaboration this book presents the resulting set of habits of mind based strategies that demonstrably help not only low income ESL and first generation college students overcome obstacles on the path to degree completion these strategies equally benefit all students They promote life long integrative learning and foster intellectual qualities such as curiosity openness flexibility engagement and persistence that are the key to developing internalized and transferrable competencies that are seldom given direct attention in college classrooms This contributed volume written with full time and adjunct faculty in mind provides the rationale for this pedagogical approach and presents the sequential instructional cycle that begins by identifying students assets and progressively focusing on specific habits to develop their capacity to transfer their learning to new tasks and situations Faculty from both two year and four year colleges provide examples of how they implement these practices in English math and General Education courses and demonstrate the applicability of these practices across course types and disciplines Chapters address key factors of college success including The link between habits of mind and student retention and achievement Using an assets based approach to teaching and learning Supporting and engaging students Creating inclusive learning communities Building confidence and self efficacy Promoting transfer of learning Teacher networks and cross disciplinary collaboration By foregrounding habits of mind as an instructional lens this book makes a unique contribution to teaching in developmental and general education settings **Climate Change and Public Health** Barry S. Levy, Jonathan Patz, 2015 Climate change is causing and will increasingly cause a wide range of adverse health effects including heat related disorders infectious diseases respiratory and allergic disorders malnutrition mental health problems and violence The scientific bases for the associations between climate change and health problems are evolving as are the strategies for

adapting to climate change and mitigating the greenhouse gases which are its primary cause With contributions from 78 leading experts in climate change and in public health this book contains a concise and comprehensive book that represents a core curriculum on climate change and public health including key strategies for adaptation and mitigation Written primarily for students and mid career professionals in public health and environmental sciences the book clearly describes concepts and their application to the health impacts of climate change Chapters are supplemented with case studies graphs tables and photographs The book s organization in 15 chapters makes it an ideal textbook for graduate and undergraduate courses in public health environmental sciences public policy and other fields
