The understanding of sex drive in both men and women can help to bring out the conundrum in the shifting relationship boundaries. Several studies have already indicated that men's sex drive was more leaned towards the opposite sex while women tended to lean with equal intensity to both sexes. This paper is a critic of an article that seeks to find out whether higher sex drive is associated with the increased sexual attraction in both men and women.

The primary problem of the article which formed the basis of the research was to find out whether sex drive was related to the increase of sexual attraction of individuals towards both men and women. The problem of the study is based on the literature review presenting a number of findings on the problem. Obtained data revealed that, indeed, men and women differ in their sex drive when it comes to the attraction towards the representatives of both sexes. In particular, the reviewed literature indicated that women show sex drive of equal intensity when they see an attractive man as much as an attractive woman; in other words, women have more bisexual nature than their counterparts man whose sex drive to either same-sex partner or the opposite sex partner was unwavering. RESEARCH PROPOSAL: CRAFTING WITH AI AWARENESS Samad Sepasgozar, 2024-09-09 Academic proposals have clear communication and standardized formatting in most fields while creative presentations might be acceptable in design or artistic fields. Imagine your research proposal including a novel concept buried under flashy fonts, diverse colors, and confusing graphics, resulting in losing the key message in a visual cacophony. This chapter guides you through crafting a proposal with clear information that resonates with scientific norms, ensuring clarity and coherence from the cover to the conclusion. We'll explore font choices, graphic elements, and formatting with a clear structure to elevate your message without distracting from its core excellence. A plain, well-structured research proposal should highlight the research rigor, not the visual effects.
