State DOT Management Techniques for Materials and Construction Acceptance Gary Roderick Smith, 1998 This synthesis will be of interest to state Department of Transportation DOT materials and construction engineers, contract procedure and specification specialists, construction personnel managers, researchers, and private consultants. The synthesis describes the current state of the practice of state DOT management techniques for materials and construction acceptance, including approaches to inspection and testing. The associated requirements for maintaining adequate qualified personnel to operate the acceptance and testing programs are considered in the information reported. The information was collected by surveying state DOTs and by conducting a literature search. This report of the Transportation Research Board presents background information on the changing role of specifications, quality assurance processes, warranties, material certifications, and personnel management regarding the state of the practice for state DOT management techniques for materials and construction acceptance. In addition, detailed information is presented on personnel issues. The details of materials test methods and statistical quality control procedures are not included in the report. However, discussion of these technical aspects of materials and construction acceptance are included on the basis of their influence on personnel training requirements and changes in administrative requirements.

Worker Injury Third Party Cases Vincent A. Gallagher, 2017-06-22 *Worker Injury Third Party Cases: Recognizing and Proving Liability* is a practical resource that helps lawyers and others identify viable third party theories of liability in worker injury cases. It helps attorneys make what is perhaps their most important economic decision: knowing when to accept and when to reject a new case. This book provides information to help both plaintiff and defense attorneys recognize the strengths and weaknesses of their case. It aims to reinforce the notion that litigation is truly a search for truth and justice. Part I provides an understanding of what should be done to implement the overall job site safety program. Parts II and III aid in identifying and preparing injury cases related to construction and premise cases. Part IV should be helpful in products cases. Part V includes chapters of general interest. Many chapters include lists of questions which can be used in deposition or cross examination of defendants and experts. It serves as a practical resource for all parties in a wide variety of worker injury cases.
