**BIM and Big Data for Construction Cost Management** Weisheng Lu, Chi Cheung Lai, Tung Tse, 2018-10-11 This book is designed to help practitioners and students in a wide range of construction project management professions to understand what building information modelling BIM and big data could mean for them and how they should prepare to work successfully on BIM compliant projects and maintain their competencies in this essential and expanding area. In this book the state of the art information technologies that support high profile BIM implementation are introduced and case studies show how BIM has integrated core quantity surveying and cost management responsibilities and how big data can enable informed decision making for cost control and cost planning. The authors combined professional and academic experience demonstrates with practical examples the importance of using BIM and particularly the fusion of BIM and big data to sharpen competitiveness in global and domestic markets. This book is a highly valuable guide for people in a wide range of construction project management and quantity surveying roles. In addition implications for project management facilities management contract administration and dispute resolution are also explored through the case studies making this book essential reading for built environment and engineering professionals. Practical Guide to the NEC3 Engineering and Construction Contract Michael Rowlinson, 2015-12-14 Launched in 1993 the NEC Engineering and Construction Contract has become one of the UK's leading standard forms of contract for major construction and civil engineering projects. The third edition popularly known as NEC3 is a process based contract embodying project and commercial management best practice so its basic philosophy differs from the more adversarial approach of other standard construction contracts. Since the first edition of this book the third edition of the contract has seen the introduction of a new secondary option for use in the UK and amendments to a number of clauses. In addition in September 2011 changes were introduced to cater for the amendments to the Housing Grants Construction and Regeneration Act 1996 contained in the Local Democracy Economic Development and Construction Act 2009 which became effective for all new contracts entered into from 1 October 2011. These amendments have been incorporated into the text. A Practical Guide to the NEC3 Engineering and Construction Contract will be useful to everyone in the construction industry working on a project under this contract. It will be of interest to the complete construction supply chain including employers construction professions contractors and sub contractors as well as consultants and lawyers advising any of these parties either in the preparation of contract documentation or the day to day management or the resolution of problem situations which may arise. **Domestic Engineering and the Journal of Mechanical Contracting**, 1915 **Standard and Poors 500 Guide 2013** Standard & Poor's, 2012-12-21 The most up to date and accurate market intelligence for superior investment decisions from the world's premier financial index.
