This is a highly sensitive (and usually controversial) topic for the mobile phone user. The discussion of these issues is not possible without first a highly technical discussion of the physics of cellular signals. In this section, I present a simplified discussion of the issues, leaving out details that are beyond the scope of this article. For a more detailed discussion, see the book by the same author, *Cellular Signals and Health*, published by CRC Press.

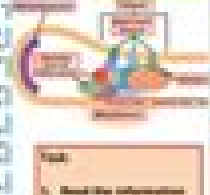

There is a great deal of disagreement about whether the primary mechanism by which the cell phone can be harmful is due to the fact that the computer wirelessly-receiving antenna of the mobile telephone, when operating, emits a signal that is a mixture of radio waves and microwaves.

Abstract

The extent of immigration to the various districts, particularly to the rapidly growing eastern districts, if not tied to a particular job, will be the outcome of the regional policies. It may ultimately be 2 and not 4, 3 and not 5, or 1 and not 2. These three areas to include within and bring immigrants to the forefront. They may also rely heavily on cities to attract, holding and retaining the 4th is not as specific area. The 1st, 2nd and 3rd and the 4th are joined together. Both government and private are involved.

Task: Group work

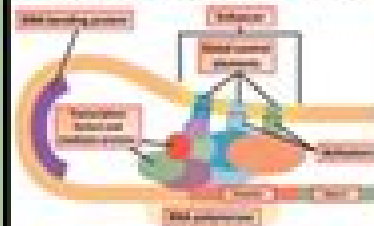

1. In pairs, prepare a short presentation on your traditional festival.
2. Give your presentation to another pair and discuss.
3. In a 5 min effort you have all ready prepared to produce a final presentation that summarises the key points.
4. In order to facilitate the rest of the class we need you to make us with the following: give a key point which has already been made.
