Berry, Gayle Mindes, 1993 A complete planning model with goals themes and activities for theme based teaching *Early Childhood Curriculum for All Learners* Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12 Early Childhood Curriculum for All Learners Integrating Play and Literacy Activities is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills The authors link solid play based research to specific developmentally appropriate practices By combining these two areas the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play In addition the text focuses on socio dramatic play a recently acknowledged essential aspect of child initiated play interactions It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades Implementation of the information presented in this book will enable children to experience a richer transition into primary education classrooms The Contemporary Archaeology of Emotions:

Re-Framing the Past and Present Tuuli Matila, 2025-09-30 This SpringerBrief examines emotions in the past through contemporary archaeological materials The author explores this topic using the context of a former working class neighbourhood in northern Finland that existed during the Cold War era 1947 1987 Finland offers an interesting context to examine this because of the twofold emotional frames the Cold War and capitalism versus the nascent welfare state The push and pull between the values emphasizing universal care and compassion against the hardline militarisation and financial competition results in accessing different and sometimes contradictory emotions It also affords a gendered view into the past and such an angle could be attempted in the context of the deep past as well This book offers several examples on how emotions could be accessed in the deep past and draws parallels between the examples from a contemporary western

country and various archaeological cultures and contexts Emotions can be a bridge to access the secrets of human behavior Such bridging is the core strength of archaeological education but rarely are emotions acknowledged in the process Lastly this book underlines the role of emotions specifically empathy in archaeological education and in destabilizing contemporary political notions on social norms and contracts
