governing the city The book explores three main themes Part I examines fast cities as new urban utopias which propagate the illusion that they are quick fix sustainable solutions to insulate us from future crises Part II discusses the role of the entrepreneurial state that despite its neoliberalisation is playing a key role in shaping mega urbanization through laws policies and brute force Part III finally delves into how fast cities built by entrepreneurial states actually materialise at the scale of regional urbanization rather than as metropolitan growth This book explores the contradictions between intended and unintended outcomes of fast cities and points to their fault lines between state sovereignty capital accumulation and citizenship It concludes with a vision and manifesto for slow and decelerated urbanism This timely and original book presents urban scholars with the theoretical empirical and methodological challenges of mega urbanization in the global south as well as highlighting new theoretical agendas and empirical analyses that these new forms of city making bring to the fore
