VanFossen,Michael J. Berson,2008 In 1991 Lawrence Grossman wrote that a new political system is taking shape in the United States As we approach the twenty first century America is turning into an electronic republic a democratic system that is vastly increasing the people s day to day influence on decisions of state Grossman s forecast implied a sea change in the way citizens would interact with and participate in their representative government a revamping of the way Americans would do citizenship Harnessing the power of technology to promote the ideal of democracy that first pulsed through our nation over 230 years ago may be a feasible achievement in a technocratic age but whether technology can help achieve a revolution as seismic as the political one that our founding fathers initiated may be a practical impossibility Fusing the power of technology and democratic ideals opens opportunities for greater access to information and offers a medium for people to be heard and express their voice with dissemination to the masses through digital tools such as blogs podcasts and wikis Indeed the emergence of the Internet as a nearly ubiquitous element of American society has brought about new opportunities to enhance citizen engagement in democratic politics and to increase the level of civic engagement among American citizens Despite such rhetoric however research has indicated that Grossman s electronic republic has for the most part failed to come to fruition **Understanding Your International Students** Jeffra Flaitz,Leslie Kosel Eckstein,2003
