City Of Windhoek Municipality:

Writing Windhoek Ellison Tjirera, 2025-10-01 Small cities have something to offer in terms of theoretical resources and renewing our understanding of urban life In other words all cities do matter and are therefore worthy of drawing from Condemning insignificant cities to oblivion is a travesty that will leave urban studies poorer Importantly no city is reducible to one register in the representation of its essence In *Writing Windhoek* Ellison Tjirera makes an attempt to revivify the Capital city of Namibia and treat it as an idea meriting a closer examination and reflection In illuminating the essence of Windhoek s cityness this book traces its history of spatial segregation an imprint that continues to define contemporary city life The cultural memory of Windhoek is analysed as a way of accessing what is otherwise a not so obvious strand through which to understand a city that has escaped a sustained scholarly rendition In his further layering of the city Tjirera provides a portrait of Windhoek through urban fantasies regimes of the legal and how migration is implicated in shaping social heterogeneity and concatenations of various urban rhythms

Surviving on the Move Jonathan Crush,Bruce Frayne,2010-02-01 Since the collapse of apartheid there have been major increases in migration flows within to and from the Southern African region Cross border movements are at an all time high

across the region and internal migration is at record levels The implications of greater mobility for areas of origin and destination have not been systematically explored Migration is most often seen as a negative phenomenon a result of increased poverty and the failure of development More recently the positive relationship between migration and development has been emphasised by agencies such as the Global Commission on International Migration the Global Forum on Migration and Development the United Nations Development Programme and the African Union The chapters in this publication are all based on primary research and examine various facets of the relationship between migration poverty and development including issues that are often ignored in the migration development debate like migration and food security and migration and vulnerability to HIV The book argues that the development and poverty reduction potential of migration is being hindered by national policies that fail to recognise and build on the positive aspects and potential of migration As a result as these studies show migrants are often pushed to the margins where they are forced to survive on the move Their treatment violates labour laws and basic human rights and compromises the potential of migration as a means to create sustainable livelihoods reduce poverty and food insecurity mitigate the brain drain and promote the productive use of remittances This book shows that migrant lives and livelihoods should be at the centre of international and African debates about migration poverty and development
