The Eco-Home Design Guide Christopher Day, 2015-10-29 The key principles of designing a pleasant comfortable and healthy eco home with a foreword written by HRH The Prince of Wales now King Charles III Designing an eco home is much more

about working with your house's location and situation than relying on intrusive technology and hi tech materials. With the soaring energy bills and the climate crisis it is now more important than ever to invest in a home that is considerate of keeping heat in. In this handbook architect Christopher Day draws on his extensive experience to explain the key principles of eco home design using common sense methods. Packed full of practical information it includes several case studies of eco homes reviewing with hindsight what worked well and what could have been better. There is also guidance on how to generate energy upgrading old buildings and site planning. With beautifully hand drawn illustrations Christopher explores how to use local topography combined with landscaping to improve your home's microclimate and keep your house dry and warm in the winter and cool in the summer. There are also handy tips on how to minimise hidden environmental impacts and ideas on ways to make your home a safe and healthy place both emotionally and physically. The Eco Home Design Guide is essential for anyone who wants to create an attractive environmentally friendly home that is in harmony with its location.

Good Green Homes Jennifer Roberts, 2009-09 Green. It conjures images of a meadow in spring for some and the color of money for others. What does green have to do with our homes? In essence green building or sustainable building means being smart about how we use energy, water and building materials so that we can live well without needlessly damaging the environment. Creating a good green home isn't just about conservation about using less or saving more although that's certainly part of it. It's about creating better homes that are easier on the environment, less expensive over the long term and more delightful to come home to. That's the message Jennifer Roberts wants to share in Good Green Homes, the ultimate new guide for people who want to live in comfortable, healthy, environmentally conscious homes. With some simple steps outlined in this book you can save money and do your part to help save the environment. For instance using an energy efficient light bulb saves you money. It also results in less demand for electricity which in turn results in less pollution from power plants which may help a child with asthma breathe a little easier. If you associate green

built housing with the unconventional or the quirky tree houses geodesic domes dwellings constructed of tires or soda bottles think again Perfect for homeowners remodelers renters who might be surprised by how much is within their power to change architects builders and interior designers this book lays out seven fundamental principles of green building illustrated with more than 150 color and 20 black and white photographs of more than twenty five homes Jennifer Roberts launched two retail stores in San Francisco specializing in environmentally sensible consumer products including household goods and is a freelance writer and editor on topics that include energy efficient building design and systems *Building with Vision* Dan Imhoff,2001 Part green building primer part architectural photo essay this is an essential resource for professionals and homeowners interested in the leading edge of environmental building Imhoff traveled extensively to document and photograph beautiful and novel alternatives to wood intensive building Building with Vision is the first book to link residential building with forest impacts Nearly 1 5 million new houses are built in the United States each year 90 percent framed with wood and the average house consuming an acre s worth of trees But as Building with Vision shows from framing and siding to new building systems and finish materials there are many ways architects contractors and homeowners can make high quality resourceful long lasting and beautiful decisions Details include building techniques as well as materials including Styrofoam steel concrete straw bales rammed earth adobe and much more The Real Goods Solar Living Sourcebook John Schaeffer,1999 Covers power conservation and gear **Alternatives Journal** ,2004 Canadian environmental ideas action varies *Design of Straw Bale Buildings* Bruce King,Mark Aschheim,2006 A design manual for practicing professionals this title draws on the collective experience of the most senior and respected figures in the rapidly emerging field of straw bale construction **Gaiam Real Goods Solar Living Sourcebook** John Schaeffer,Doug Pratt,2001 Covers power conservation and gear **The country** ,1877 *Practical Masonry* William R.
