The Moral Conflict of Law and Neuroscience Peter A. Alces, 2018-01-24 Law relies on a conception of human agency the idea that humans are capable of making their own choices and are morally responsible for the consequences But what if that is not the case Over the past half century the story of the law has been one of increased acuity concerning the human condition especially the workings of the brain The law already considers select cognitive realities in evaluating questions of agency and responsibility such as age sanity and emotional distress As new neuroscientific research comprehensively calls into question the very idea of free will how should the law respond to this revised understanding Peter A Alces considers where and how the law currently fails to appreciate the neuroscientific revelation that humans may in key ways lack normative free will and therefore moral responsibility The most accessible setting in which to consider the potential impact of neuroscience is criminal law as certain aspects of criminal law already reveal the naiveté of most normative reasoning such as the inconsistent treatment of people with equally disadvantageous cognitive deficits whether congenital or acquired But tort and contract law also assume a flawed conception of human agency and responsibility Alces reveals the internal contradictions of extant legal doctrine and concludes by considering what would be involved in constructing novel legal regimes based on emerging neuroscientific insights

Conflict, Negotiation and Perspective Taking Sandra Pineda de Forsberg, Roland Reichenbach, 2021-09-02 In a world where conflicts are commonplace and almost unavoidable negotiation is recommended as the preferred approach for productively handling the outcomes of disputes In addition negotiation is recognized as an enabler of a constructive grounded attitude toward conflict This book advocates that perspective taking is a superior competency to effectively understand the points of view of others as well as a means to create a beneficial outcome to a conflict attain sustainable business and solutions and develop healthier relationships The three central themes presented in this book conflict negotiation and interpersonal perspective taking provide different important insights into the handling of disputes and the practice of negotiation In depth understanding of these themes enables the negotiator to forge a three dimensional instrument for effective conflict management The concept of conflict is first introduced followed by an examination of the negotiation process including negotiation strategies negotiation phases negotiation competencies and styles Considerable attention is then paid to interpersonal perspective taking and its critical role in successful interpersonal negotiation strategies before a theoretical discussion on negotiation research models concludes the book The intent throughout this book is to empower the reader to make the best of every conflict situation and contribute to harmonious and respectful working

environments Every individual employee and leader is encouraged to become a proficient negotiator who seeks mutually productive and successful results The mutual wins require careful consideration of the other s perspective and interests Although this work primarily addresses professional contexts the principles and their applications are also highly useful for everyday situations

Managing Conflict in Facility Siting Sidney Hayden Lesbirel,Daigee Shaw,2005-01-01 The book addresses a growing policy problem confronting all democratic nations By exploring the lessons to be learned from international siting experiences it will prove invaluable reading for academics policymakers government agencies NGOs and other societal interests involved in environmental and siting issues BOOK JACKET
