*Changing the Grade* Jonathan Cornue, 2018-01-18 Many educators agree that the 100 point grading model is not always a reliable way to evaluate student learning But is there another way to more accurately and equitably grade students and provide high quality information to parents while fostering student learning If so why haven't school districts across the country changed their practices In *Changing the Grade* author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards based grading system including 30 steps to guide you through the process In addition to identifying and addressing the barriers to change such as concerns about how colleges and employers will interpret an alternative grading model Cornue offers a concrete structure for changing the grading system providing guidance on Thinking in a new way about why grades are given and the purpose of a report card grade Identifying what needs to be changed and what actions must be taken to facilitate the change Building a team of stakeholders including teachers principals and guidance counselors to lead the change process Developing the new standards based grading structure Designing standards based assignments and assessments that align with a new grading structure Avoiding grade inflation and Getting buy in from teachers and other staff members principals administrators the board of education and the community by demonstrating that the change process is intentional research based student focused and permanent The book also includes helpful samples of standards based gradebooks homework assignments rubrics and report cards If you are interested in making a systemic and systematic shift to a high quality grading structure that is far less subjective than many commonly found in schools consider *Changing the Grade* Structural Information and Communication Complexity Andrzej Pelc, 2005-05-17 SIROCCO 2005 was the twelfth in this series held in Mont Saint Michel France May 24 26 2005

**Geometry** Judith D. Sally, Paul J. Sally (Jr.), 2011 This geometry book is written foremost for future and current middle school teachers but is also designed for elementary and high school teachers The book consists of ten seminars covering in a rigorous way the fundamental topics in school geometry including all of the significant topics in high school geometry The seminars are crafted to clarify and enhance understanding of the subject Concepts in plane and solid geometry are carefully explained and activities that teachers can use in their classrooms are emphasised The book draws on the pictorial nature of geometry since that is what attracts students at every level to the subject The book should give teachers a firm foundation on which to base their instruction in the elementary and middle grades In addition it should help teachers give their students a solid basis for the geometry that they will study in high school The book is also intended to be a source for problems in geometry for enrichment programmes such as Math Circles and Young Scholars **The Secondary School Curriculum and Syllabi of Subjects ...** Minnesota.
