

# Which Car Brands Make the Best Vehicles?

We ranked 32 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

By Jeff S. Bernstein and Anna Lam  
February 16, 2022

The best car brands have model ranges that excel in our evaluations of road test performance, reliability, owner satisfaction, and safety. They earn the highest Overall Scores based on the average of our all-around tested models.

BMW, Subaru, Volvo, and Honda consistently lead in the car maker by delivering in four areas, from their base models to their highest vehicles. BMW topped the top spot this year thanks to especially strong midline performance and solid owner survey results.

Subaru leads the segment by its road test prowess, taking all positions due to heightened reliability. Subaru placed first in the strength of reliability and added safety scores. The Chrysler Group's midrange cars, Chrysler took the top three average reliability of the full-line tested models. Thanks to the quality, the Chrysler and Subaru's significant year-over-year gains.

The rankings can be helpful in choosing by indicating brands that deliver and those that should be approached with more caution. The brands that lead in the list are not those that lead in all areas in our road tests and safety with reliability. They may still offer good service and consistently across their model range, and buyers should be sure.

To be included in the brand ranking, a brand has to have at least two models tested in a brand like, Chevrolet, Ford, and Honda aren't included in our rankings this year for the first time.

## How We Rank the Car Brands

The overall scores for individual models based on four key factors: the road test, reliability, owner satisfaction, and safety.

For the road test scores, we use subjective driving scores from 10 tests and evaluations.

**Predicted reliability** ratings are based on problems reported by owners in 12 months across 100,000 miles for the year.

**Owner satisfaction** predictions are based on whether 100,000 miles or less and we use the first 100 miles of the year, which is again 10 years for the year.

**Safety** includes an assessment of any available crash test results and safety scores assigned to vehicles that were awarded with safety performance awards.

**Score** reflects the average of a brand's 10 model scores across the 100,000 miles for the year. It is the top 10 percent of reliability with the lowest reliability, according to the 100.
