Access to Knowledge for Consumers: Reports of Campaigns and Research 2008-2010 ,2010 Information Program grantee Consumers International has released the results of a global survey designed to expose the obstacles consumers face in gaining access to education and cultural materials The survey was conducted in 13 languages covering 15 000 consumers across 24 countries The survey found that The biggest barriers that consumers face in accessing copyright works are those created by copyright law Even so consumers around the world will choose original copyright works over pirated copies provided that they are available at an affordable price While borrowing from libraries and other cultural institutions provided a viable alternative for some consumers priced out of original copyrighted works the survey found that particularly in developing countries access to libraries is limited and the works they carry are few Although the authors of the survey saw copyleft initiatives like Open Educational Resources and Free and Open Source Software as great ways to help consumers vault access barriers they concluded that governments needed to act to address consumers needs for lower cost original materials to buy borrow and access online The survey forms the first two chapters of Consumers International s new report **Access to Knowledge for Consumers Reports of Campaigns and Research 2008 2010** Publisher description **Consumer Reports Buying Guide** Consumer Reports,2007-11 This is the 2008 edition to get help with trusted product reviews and comparisons **Official Gazette of the United States Patent and Trademark Office** ,2007 "Code of Massachusetts regulations, 2006" ,2006 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 *The Better World Handbook* Ellis Jones,Brett Johnson,2007-02-01 The definitive guide for people wanting to make a positive difference in the world **Journal and History of Legislation** United States. Comparative Effectiveness of Medical Treatments Peter Villa,Sophia Brun,2009 This book explores the comparative effectiveness of medical treatments as applied in the health care sector An analysis of comparative effectiveness is simply a comparison of the impact of different options that are available for treating a given medical condition for a particular set of patients These studies may compare both similar treatments such as competing drugs or they may analyse very different approaches such as surgery and drug therapy The analysis may focus only on the relative medical benefits and risks of each option or it may go on to weigh both the costs and the benefits of those options In some cases a given treatment may be found more effective for all types of patients but more commonly a key issue is determining which specific types would benefit most from it Although some information about the effectiveness of new drugs medical devices or procedures is often

available rigorous comparisons of different treatment options are less common Thus this book compares and discusses which treatments work best for which patients and whether the added benefits of more effective but more expensive services are sufficient to warrant their added costs "*Code of Massachusetts regulations, 2008*" ,2008 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020
