

Which Brands Make the Most Reliable Appliances?

CR's Appliance Brand Reliability Rankings can help you avoid problem-prone models—and the cost of repairs.

By Consumer Reports
June 12, 2024

When it's time to invest in a new refrigerator or dishwasher, you want to get one that will stand the test of time. The best way to make sure you're not shelling out for another replacement too soon? Buy from a reliable brand. Factoring in predicted reliability—based on exclusive data from CR's member surveys—will save you money over the long haul and keep refrigerators, washers, and other appliances out of the water (and landfill).

CR's sixth annual Appliance Brand Reliability Rankings show how reliable a brand is relative to others across multiple appliance types: refrigerators, dishwashers, over-the-range microwaves, ranges, cooktops, wall ovens, washing machines, and dryers. The results are based on survey data we collected from our members on 40,629 kitchen and laundry appliances purchased new between 2003 and 2020.

To calculate predicted reliability, we ask members whether their appliances broke or stopped working as well as they should. We use that data to estimate how a given brand's new models will hold up over the first five years of use. The chart only includes brands for which we have reliability ratings in at least two categories of major appliances.

The predicted reliability ratings for appliances from each brand are an average of the ratings for all types of that brand's appliances (for example, front loaders, top loaders, etc., for washing machines).

For each brand, the average predicted reliability score has been adjusted to account for differences among types of appliances. A brand that scores relatively high marks for its French-door refrigerators, for example, will get a bump in its score because French-door models are typically less reliable than other refrigerator types. Without this statistical adjustment, a brand that makes only top-freezer refrigerators—the most reliable type—would have an unfair advantage over brands that make multiple types.

For again, Speed Queen sits atop our rankings and is the only brand to achieve a top Overall Score. And once again, Viking landed at the bottom of our chart, joined this year by another elite brand, Thermador, which also received an unfavorable Overall Score.

The luxury appliance brand Gaggenau debuted on our chart this year, tying with two other brands for seventh place. Gaggenau has three product categories in our brand reliability ranking calculations: dishwashers, cooktops, and wall ovens.

Fisher & Paykel saw the largest advance between last year's and this year's rankings, moving up seven spots from last year and adding seven points to its Overall Score. Kenmore and Bosch experienced the biggest drops, falling nine and eight places in rank, respectively. Kenmore managed to retain its middle-tier ranking, but Bosch slipped from a favorable ranking to one that is just average.

Keep in mind that our predicted reliability ratings are not an indicator of performance. In years when you settle on a reliable brand, you'll want to check out full appliance ratings to find a specific model that performs well in our rigorous lab tests. In our ratings of washing machines, dryers, and dishwashers, look for our Green Choice designation, which identifies appliances with a lower environmental impact.
