Language, Feeling, and the Brain Daniel Shanahan,2011-12-31 Linguistic theory since the Cognitive Revolution has followed one of the premises of that revolution by largely sidelining the issue of emotions and concentrating on those aspects of language that are more strictly cognitive However during the last ten years research in cognitive science especially in neuropsychology has begun to fill in the gaps left by the exclusion of emotions from cognitive research The work of those like Oatley Zajonc Damasio and LeDoux to name a few has demonstrated both that it is possible to construct models of how emotions play into the workings of the psyche and that they are necessary in giving us a balanced view of the human mind *Language Feeling and the Brain* attempts to apply the fruits of this new research in emotion to our understanding of language itself Building on Karl Pribram s integrated model of emotions and motivations the book takes an eclectic approach to explaining how emotions contribute to the nature of language drawing on research done in neuropsychology philosophy cognitive linguistics anthropology and related fields Its aim is to construct a propositional model for how the emotions may

have contributed to the emergence of symbolic formation most especially in the forms of gesture and speech and how identifying that emotional influence sheds new light on everything we have had to say about language itself from lexis and grammar to culture and literature Philosophy of Language and Linguistics Piotr Stalmaszczyk, 2014-06-23 The present volume investigates the legacy of Gottlob Frege Bertrand Russell and Ludwig Wittgenstein in contemporary philosophy of language and linguistics These philosophers inspired both the development of analytic philosophy and various philosophical approaches to the study of language They have influenced technical discussions on truth proper names definite descriptions propositions and predication sense and reference truth and philosophical and linguistic inquiries into the relations between language mind and the world The studies gathered in this volume discuss most of these issues and aim to show that the results of this research are still of utmost importance and that the three philosophers have significantly contributed to the linguistic turn in philosophy and the philosophical turn in the study of language The volume includes contributions by Joachim Adler Zurich Maria Cerezo Murcia Pawel Grabarczyk Lodz Arkadiusz Gutt Lublin Tom Hughes Durham Gabriele Mras Vienna Carl Humphries Cracow Gary Kemp Glasgow Siu Fan Lee Hong Kong Jaroslav Peregrin Prague Ulrich Reichard Durham Piotr Stalmaszczyk Lodz Piotr Szalek Lublin Mieszko Talasiewicz Warsaw **Books in Print Supplement** ,2002
