Developing a Model to Quantify Emissions from Heavy-duty Construction Equipment as Related to Job Site Activity Data Robert Luther Russell, George Scora, Kent Charles Johnson, Thomas D. Durbin, 2014 **Love Letters from Golok** Holly Gayley, 2016-12-06 Love Letters from Golok chronicles the courtship between two Buddhist tantric masters T re Lhamo 1938 2002 and Namtrul Rinpoche 1944 2011 and their passion for reinvigorating Buddhism in eastern Tibet during the post Mao era In fifty six letters exchanged from 1978 to 1980 T re Lhamo and Namtrul Rinpoche envisioned a shared destiny to heal the damage done to Buddhism during the years leading up to and including the Cultural Revolution Holly Gayley retrieves the personal and prophetic dimensions of their courtship and its consummation in a twenty year religious career that informs issues of gender and agency in Buddhism cultural preservation among Tibetan communities and alternative histories for minorities in China The correspondence between Tare Lhamo and Namtrul Rinpoche is the first collection of love letters to

come to light in Tibetan literature Blending tantric imagery with poetic and folk song styles their letters have a fresh vernacular tone comparable to the love songs of the Sixth Dalai Lama but with an eastern Tibetan flavor Gayley reads these letters against hagiographic writings about the couple supplemented by field research to illuminate representational strategies that serve to narrate cultural trauma in a redemptive key quite unlike Chinese scar literature or the testimonials of exile Tibetans With special attention to Tare Lhamo's role as a tantric heroine and her hagiographic fusion with Namtrul Rinpoche Gayley vividly shows how Buddhist masters have adapted Tibetan literary genres to share private intimacies and address contemporary social concerns

**Complex Problem Solving Beyond the Psychometric Approach** Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e.g. minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
