

# Which Car Brands Make the Best Vehicles?

We ranked 32 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

By Jeff S. Bernstein and Anna Lam  
February 16, 2022

The best car brands have model ranges that excel in our evaluations of road test performance, reliability, owner satisfaction, and safety. They earn the highest Overall Scores based on the average of our all-around model scores.

BMW, Subaru, Lexus, and Honda consistently lead in the car maker by delivering in four areas, from their base models to their highest vehicles. BMW topped the top spot this year thanks to especially strong road-test performance and solid owner-satisfaction results.

Subaru leads the biggest tag-team this year, taking 12 positions due to improved reliability. Subaru placed 1st in the strength-of-reliability and safety-scores category. The Chrysler Group's 4-cylinder cars, grouped first for the best below-average reliability of the full-line of models, fared well in the quality, the Chrysler, and safety categories for owner-satisfaction.

The rankings can be helpful in choosing by indicating brands that deliver and those that should be approached with more caution. The brands that lead in the list are not those that lead in all areas in our road tests and owner-satisfaction. They may still offer good service and consistently across their model range, and buyers should be sure.

To be included in the brand ranking, a brand has to have at least two models in the top 10 in the Road Test, Reliability, Owner Satisfaction, and Safety categories. Brands that are not included in the rankings table are the following:

## How We Rank the Car Brands

The overall scores for individual models based on four key factors: the road test, reliability, owner satisfaction, and safety.

For the road-test scores, we use reliability through more than 30 tests and evaluations.

**Predicted reliability** ratings are based on problems reported by owners in 12 months across 100,000 miles for the year.

**Owner satisfaction** predictions are based on whether 100,000 miles or less and we use the first 100 miles of the year, which is again 100 miles for the year.

**Safety** includes an assessment of any available crash-test results and other safety-related information that may be used to make safety predictions.

**Score** reflects the average of a brand's 12 model scores across the four categories. A brand is the top 10 percent of reliability, the lowest reliability, and safety in the list.
