Forest Products and Forestry The purpose of these case studies is to provide students with applications of the concepts being discussed within the text The third is revisiting the question of how to use economic information to make better business decisions at the end of each chapter This ties each chapter to the preceding ones and reinforces the hypothesis that a solid working knowledge of these economic models and the information they contain are necessary for making better business decisions This textbook is an invaluable source of clear and accessible information on forestry economics and management for not only economics students but for students of other disciplines and those already working in forestry and natural resources
