**Commodity Chains and Global Capitalism** Gary Gereffi,Miguel Korzeniewicz,1993-11-30 The current restructuring of the world economy under global capitalism has further integrated international trade and production It thus has brought to the fore the key role of commodity chains in the relationships of capital labor and states Commodity chains are most simply defined as the link between successive processes of manufacturing that result in a final product available for individual consumption Each production site in the chain involves organizing the acquisition of necessary raw materials plus semifinished inputs the recruitment of labor power and its provisioning arranging transportation to the next site and the construction of modes of distribution via markets and transfers and consumption The contributors to this volume explore and elaborate the global commodity chains GCCs approach which reformulates the basic conceptual categories for analyzing

varied patterns of global organization and change The GCC framework allows the authors to pose questions about development issues past and present that are not easily handled by previous paradigms and to more adequately forge the macro micro links between processes that are generally assumed to be discretely contained within global national and local units of analysis The paradigm that GCCs embody is a network centered historical approach that probes above and below the level of the nation state to better analyze structure and change in the contemporary world      *Consumer Reports Used Car Buying Guide* Consumer Reports,2004-03-02 This trustworthy guide has step by step advice on used cars from selection to shopping strategies vehicle inspection negotiation techniques and closing the deal Also includes details about all checks performances and how to find a good mechanic
