

# A Checklist for Auto Repair Shops

This self-audit tool is designed to help auto repair shop owners achieve and maintain regulatory compliance. Municipal health, fire prevention, and building inspectors may also find it useful for preliminary screening and for assisting shops.

The requirements listed here are based on federal environmental and health and safety regulations, as well as nationally recognized fire code. While the checklist includes the primary concerns of regulatory inspections, it is not intended to be a comprehensive statement of compliance requirements.

The regulatory items listed on this form fall into two main categories: those in Section A relate to overall conditions at the site; those in Section B cover specific auto repair shop operations. Section C provides space to comment on any deficiencies observed during an inspection.

Also included with this compliance checklist is a list of tips for preventing pollution, fires, and health and safety hazards. While not required by law, following these practices helps to reduce compliance costs and ensure the well-being of employees.

Check only those items that require remedial action.
