Web Mining V.S. Kumbhar,K. S. Oza,R.K. Kamat,2022-09-01 Web mining is the application of data mining strategies to excerpt learning from web information i e web content web structure and web usage data With the emergence of the web as the predominant and converging platform for communication business and scholastic information dissemination especially in the last five years there are ever increasing research groups working on different aspects of web mining mainly in three

directions These are mining of web content web structure and web usage In this context there are good number of frameworks and benchmarks related to the metrics of the websites which is certainly weighty for B2B B2C and in general in any e commerce paradigm Owing to the popularity of this topic there are few books in the market dealing more on such performance metrics and other related issues This book however omits all such routine topics and lays more emphasis on the classification and clustering aspects of the websites in order to come out with the true perception of the websites in light of its usability In nutshell Web Mining A Synergic Approach Resorting to Classifications and Clustering showcases an effective methodology for classification and clustering of web sites from their usability point of view While the clustering and classification is accomplished by using an open source tool WEKA the basic dataset for the selected websites has been emanated by using a free tool site analyzer As a case study several commercial websites have been analyzed The dataset preparation using site analyzer and classification through WEKA by embedding different algorithms is one of the unique selling points of this book This text projects a complete spectrum of web mining from its very inception through data mining and takes the reader up to the application level Salient features of the book include Literature review of research work in the area of web miningBusiness websites domain researched and data collected using site analyzer toolAccessibility design text multimedia and networking are assessedDatasets are filtered further by selecting vital attributes which are Search Engine Optimized for processing using the Weka attributed toolDataset with labels have been classified using J48 RBFNetwork Na veBayes and SMO techniques using WekaA comparative analysis of all classifiers is reportedCommercial applications for improving website performance based on SEO is given   *Data Mining with Decision Trees* Lior Rokach,2008 This is the first comprehensive book dedicated entirely to the field of decision trees in data mining and covers all aspects of this important technique Decision trees have become one of the most powerful and popular approaches in knowledge discovery and data mining the science and technology of exploring large and complex bodies of data in order to discover useful patterns The area is of great importance because it enables modeling and knowledge extraction from the abundance of data available Both theoreticians and practitioners are continually seeking techniques to make the process more efficient cost effective and accurate Decision trees originally implemented in decision theory and statistics are highly effective tools in other areas such as data mining text mining information extraction machine learning and pattern recognition This book invites readers to explore the many benefits in data mining that decision trees offer Self explanatory and easy to follow when compacted Able to handle a variety of input data nominal numeric and textual Able to process datasets that may have errors or missing values High predictive performance for a relatively small computational effort Available in many data mining packages over a variety of platforms Useful for various tasks such as classification regression clustering and feature selection Sample Chapter s Chapter 1 Introduction to Decision Trees 245 KB Chapter 6 Advanced Decision Trees 409 KB Chapter 10 Fuzzy Decision Trees 220 KB Contents Introduction to Decision Trees Growing Decision Trees Evaluation of Classification Trees Splitting
