Fort Worth from World War II to 1960 Harold Rich, 2025-09-15 Fort Worth from World War II to 1960 reviews Fort Worth's history during the challenging times of World War II the postwar adjustment period and the first full decade of the Cold War Harold Rich tells the story in broad strokes with foci on local crime and criminals vice the police race relations and economic development What emerges is a portrait of a growing city developing major urban accoutrements such as industrialization freeways and an art infrastructure while also struggling with an active and sizable criminal underworld and the emerging Civil Rights Movement The overall impression is that the nearly two decades from 1942 to 1960 were critical to transitioning Fort Worth from a nineteenth to a twentieth century city but the end result was not an unqualified success Fort Worth would achieve significant economic progress in the 1940s especially from the addition of Convair that would expand its population at a fast pace but would lose much of that momentum in the 1950s During both decades the police confronted rising demands related to traffic control and internal corruption that most notably affected their ability to deal with gambling and prostitution both of which seemed to be everywhere As the 1950s drew to a close both vices began to subside more from a decline in public acceptance than from police activity In the 1940s and 1950s Fort Worth's criminal underworld was a major presence heavily involved in vice and in several daring robberies including a thwarted plan to rob Carswell Air Force Base The most notorious gangsters met their ends in a long running series of internal conflicts that began during the war and destroyed most of that underworld At the same time the postwar period witnessed the spread of illegal drug use across broad societal lines sparking a corresponding response by police In contrast little changed regarding race relations despite the efforts of many local activists and favorable rulings emanating from the nation's courts More significant progress would come in the 1960s and accelerate thereafter
