Business of Banking George M. Bollenbacher, 1992. *The New Business of Banking: Surviving and Thriving in Times of Unparalleled Consolidation and Competition* by George M. Bollenbacher shows financial institutions how they can be among the winners in their field. It takes an eye-opening positive point of view focusing on what the winners are doing, how they are doing it, and how to become a leader in the new era of financial services. With the spectacular collapse of BCCI, a 70 billion bailout of the FDIC, and one complete segment of the industry, the savings and loan associations poised on the edge of extinction, it's apparent that banks are reflecting the economic conditions of the country. Financial institutions appear to be caught in a maelstrom of disaster. In fact, the banking industry is already restructuring itself into what will eventually become a much smaller group of winners. But bankers have the tools and the opportunity to build a good if not spectacular business. *The New Business of Banking* shows that banks can rule their own fate and that fate can be a good one. Issues such as customer service and serious competitive analysis will play a major role in determining whether or not financial institutions will be winners. *The New Business of Banking* presents a comprehensive guide to organizational fitness, exploring numerous topics in detail, including key global economic issues as they relate to a bank's survival, effects of the bank crisis on profits and management strategies, making the most of fewer resources, capturing customers and franchises, and strategies that winners will use to outpace the competition. *The New Business of Banking* is designed to help bankers win the competitive struggle. It is designed to help bankers change their thinking about themselves, their industry, their customers, and their competitors. It is designed to help them identify their strengths and weaknesses and to develop strategies built around both. It is designed to help them transform themselves, their employees, and their institutions into tough, competitive winning organizations. [Microsoft Project Version 2002 Inside Out](#) Teresa S.
